

Debug Registry Settings

1. Introduction

This document describes the various Global registry settings under the following registry key:

HKEY_LOCAL_MACHINE\Software\Global\Client\Debug

Although some of these settings are documented elsewhere in the Global Operating Manual (Windows) V8.1 Manual, various globalnn.doc Release Notes and INnnn.doc Technical Notes, this note only refers to 3 other documents:

GOMW	Global Operating Manual (Windows) V8.1 (man81gsmwindows.doc)
IN181	Removing Config. File Technical Note (in181-removingconfigfile.doc)
CFM81	Global Configurator Manual V8.1 (man81configurator.doc)

Unless otherwise stated, a change to a registry setting only becomes effective when the Global Client (GLOBAL.EXE) is reloaded.
