

ZA60_000001_000 \$AUTH32 authorisation control & misc

This service pack forms part of a set which introduces a new and powerful tool for authorisation control to Global 3000 and fixes a problem in selecting a printer.

\$AUTH32 authorisation control [16647]

The user authorisation vetting system provided by \$AUTH32 allows you to set up a table of authorised users with associated passwords and authorisation codes, who are allowed access (or restricted access) to Global System Manager and applications containing Authorisation Point restrictions.

See Enhancement Note ZM60_000037.doc for details

EXIT CODE 10803 [D16807]

In some cases selecting a printer within the 'Print Options' window can result in the program terminating with an EXIT CODE 10803. This only happens in cases where unit '\$PR' has not been assigned.

ZA60_000004_000 Enhancement to provide calendar look-up.

Calendar Look-up [GXIDC17525]

This enhancement introduces a calendar look-up to the majority of date prompts within Asset Register, General Ledger, Cash Manager, Debtors Ledger and Creditors Ledger.

If you wish to enable this feature please see the enhancement note

included with this service pack.

Important Note: This service pack requires GSM run-time version GSM SP-23, or later. The GX.EXE version must be V4.3, or later. These versions are required after applying this service pack even if you do not wish to use the calendar look-up feature.

This GSP has the following Pre-requisites -

ZA 60 4

This GSP is part of the following Group

ZA60_000006_000 Zero Purchase Cost Assets.

Asset Register Parameter Maintenance [D17987]

A new menu entry "Operating Options" has been added to Asset Register Parameter Maintenance. This allows a new parameter to be set. The parameter is a flag with three options to indicate whether zero purchase costs are allowed for assets. "Yes" allows zero purchase costs for assets, "No" prevents zero purchase costs for assets and "Prompt" allows zero purchase costs for assets on confirmation from the user. The parameter is defaulted to "Yes".

Asset Maintenance & Asset Data Load [D17987]

If the zero purchase costs flag is set to "No", the purchase costs for assets will not be allowed to be zero for assets that do not have template status. If it is set to "Yes" the purchase costs for assets will be allowed to be zero and if it is set to "Prompt" the user will be warned if the purchase cost is zero for a non-template asset and asked to confirm that they wish to continue.

Post Application Text

Set the new parameter in Operating Options on the Parameter Maintenance menu in System Parameters for Asset Register. The flag should be set to "Yes" to allow zero purchase costs for assets, "No" to prevent zero purchase costs for assets that do not have template status or "Prompt" to warn the user if the purchase cost is zero for a non-template asset and ask them if they wish to continue.

ZA60_000011_000 Updates to all of Asset Register

Updates to all of Asset Register [D19250]

Asset Register has been updated to the latest presentation standards in many cases merging several windows into one.

Direct Postings to General Ledger (as per Creditors Ledger, Debtors Ledger and Cash Manager) has been introduced. As a result, Transaction Entry has been completely revised including new dialogue. For details, see the attached documentation.

Due to the large number of changes, the Asset Register Manual has been fully revised to reflect the latest changes.

PLEASE NOTE.

The first time you create a posting to GL, the system will automatically update the interface. You should therefore ensure that all postings have been included in posting files and they have been imported into General Ledger.

Please copy AR-Menus from your program unit (\$P) to your data unit (ARD) after applying this Service Pack. This step is not required if

service pack ZM60_000080_000 has been applied and unit 'G3M' has been assigned to your program unit (\$P).
