

ZD61_000001_000 Enhancement to Auto-Transfer.

Auto-Transfer [D16969]

Auto-Transfer has been enhanced to improve the duplicate transaction handling.

If auto-transfer detects that an incoming transaction is a duplicate (i.e. there is already a transaction for the account with the same reference) it now shows the incoming and existing transaction details alongside each other and offers the following three options:

1) 'Enter New Reference , this allows you to supply a different reference for the incoming transaction. Choosing this option will overwrite the latter part of the second comment with the incoming transactions original reference. In addition (depending on system configuration settings) it will add transaction notes to document the change in reference.

2) Skip Transaction , this allows the duplicate transaction to be skipped. It should be noted that skipping every transaction in the transfer file may result in an empty batch which requires manual deletion.

3) Abandon Transfer , this abandons the entire transfer.

ZD61_000002_000 Update to Letter Generation.

Letter Generation [gx19854]

This enhancement pack updates Letter Generation to provide a new option that allows a statement to be attached alongside the generated letter when it is delivered via email.

Please see the note accompanying this enhancement pack for further details.
