ZH60_000001_000 $AUTH32 authorisation control

This service pack forms part of a set which introduces a new and
powerful tool for authorisation control to Global 3000.

$AUTH32 authorisation control [16647]

The user authorisation vetting system provided by $AUTH32 allows you
to set up a table of authorised users with associated passwords and
authorisation codes, who are allowed access (or restricted access) to
Global System Manager and applications containing Authorisation Point
restrictions.

See Enhancement Note ZM60_000037.doc for details

ZH60_000002_000   Problem in Detailed History Report

This service pack fixes a problem in the Sales History Detailed
History Report.

Detailed History Report [HL11705]

The detailed history report seemed only to find one product when a
specific customer account code was entered (rather than every
product).

ZH60_000005_000   Fix to support tax rate tables.

Change to support the Tax Rates - Date Range [D18981]

This service pack supports the changes in the way in which tax rates
are handled throughout the Global 3000 applications. This change to
Sales History now recognises the start date and expiry date for each
rate percentage per tax code.
