ZM60_000001_000   Various fixes

Various fixes

System Codes

The 'Right justify system codes' parameter has been moved to the
'Operating Options' parameters. This is to prevent users having to
confirm its setting every time they wish to maintain or add a system
code.

Customer/Supplier Enquiry

In some cases a STOP 25013 can occur when the 'Enquiry' option is
chosen from either the Customer or Supplier searches.

In some cases a STOP 25409 can occur when adding customer or supplier
notes if another user is already updating the account.

Upgrade

Improved consolidation in Cash Manager. Set the consolidation of
credit transfers in Cash Manager flag when upgrading from V5.0 to
V6.0.

The territory codes on the location records used by Stock Requisitions
are not being upgraded correctly. To recover data already upgraded
simply re-enter these values via Location Maintenance.

Print Options Menu

The Print Options Menu has been amended to pick up the printer
assignments for special stationery prints defined in system parameters
and present these as the default in the appropriate programs.

Post Application Text

This service pack should be applied with ZP60_000001_000 and
ZC60_000001_000.

This GSP has the following Pre-requisites -

This GSP is part of the following Group

ZM60_000002_000   Enhancements + various fixes

Enhancements + various fixes
════════════════════════════

System Parameters
─────────────────

The picking list format parameter (found on the first window within
the S.O.P. picking parameters) cannot be changed to 'in delivery note
format'.

There is a spelling mistake in the P.O.P. order printing parameter
window.

New SOP Integration parameter.

Upgrade from V5.0
─────────────────

When upgrading the stock database a STOP CODE 25078 can occur if more
than fifty unit groups have been defined.

Set new flag for validation of GL cost of purchases at PO entry to
"N".

Product Maintenance
───────────────────

The options available from the Product Maintenance and Housekeeping
menus (which include Product Details, Product Enquiries, Product
Details Report, Product Register, Product Group Maintenance, Analysis
Code Maintenance, Standard Cost Maintenance, Location Maintenance,
Unit Code Maintenance and EDI Product List Export) have been enhanced
to use the latest look and feel techniques with the adoption of GX
Presentation Standards throughout. Use of the new techniques provides
swifter, easier access to information and increased flexibility in
operations.

All Sites - Enhancement to Control Account maintenance

This service pack improves the accessibility of the windows where
control accounts are maintained. Company control accounts are set up
or amended from a single entry on the Company Parameters menu, from
which three windows are accessed in turn for ledger control accounts,
cash book control accounts and tax control accounts respectively.
These three windows are now available from separate menu entries. Tax
codes are entered on a system-wide basis from the main Administration
Parameters menu. This means that after adding a tax code the user had
to exit, select Company Parameters/GL Control Accounts and then step
through two windows before the control accounts for the new code could
be set up. This service pack provides direct access to the Tax Control
Accounts from a button in the Tax Codes window.

Contacts and Addresses Maintenance

This allows an option while entering an address, to enter contacts
specifically for that address.

Company System Parameters

This introduces a new systems parameter to validate General Ledger
cost of purchases at Purchase Order Entry which can be set to "Y" if
costs are not being posted to General Ledger.

If costs are being posted to General Ledger or the new parameter to
validate General Ledger cost of purchases at Purchase Order Entry is
"Y", a check is made for a valid General Ledger profit centre and
account code when adding products in Purchase Order Entry, and they
are prompted for if necessary.

If costs are not being posted to General Ledger and the new parameter
is N, the General Ledger profit centre and account are not validated
at Purchase Order Entry and may be left blank.

Retain Delivery Code in Sales Order Processing

Retain the delivery code when delivery instructions are amended.
Display the correct delivery details in order enquiry.

Print Action List

Use the new report options window in the action list.

Upgrade

Error message "CS record missing" displayed whilst upgrading cash
manager data.

ZM60_000003_000   Various Fixes

The following problems are fixed by this service pack:

System Parameters - Printer Assignments

Pressing the 'Close' button on the printer assignments system
parameters screen does not save any changes made to the settings.

Sales Order Processing - Invoice Print

When Global 3000 is used in conjunction with the One Office 3000
client the spurious error message "Cannot open interface file" is
displayed when printing invoices.

Reseller drill down

The layout of the Debtors and Creditors Ledger interface files have
been updated to cater for developers who wish to provide a drill down
feature into their own packages.

ZM60_000004_000   Enhancements & Various Fixes

The following problems are fixed by this service pack:

Sales Order Enquiry
—————————————————————

Repeating orders are been displayed in the un-invoiced sales orders
enquiry.

It is possible for order lines to be displayed in the wrong sequence.

Auto Transfer
—————————————

The error message "Error converting balance for customer xxxxxx to
xxx" can occur when importing a batch of transactions into the Debtors
or Creditors Ledger.

Enquiries
—————————

The error message "Error in exchange calculation for currency xxx" can
occur whilst trying to enquire upon accounts in the Debtors or
Creditors Ledger.

S.O.P. Delivery Parameters
——————————————————————————

For changes to Bulk Confirmation, a new window has been added at the
end of the delivery parameters called Bulk Confirmation Options. This

window includes flags to perform the standard credit check before
allowing Despatch Confirmation; include held orders in the list of
unconfirmed orders; and display the profit margin percentage for each
unconfirmed order.

S.O.P. Picking List Parameters
────────────────────────────────

For changes to Bulk Confirmation, a new parameter to print held orders
with allocated stock on the picking list has been added to Picking
List Parameters.

ZM60_000005_000   Various Fixes

This service pack solves the following problems:

Tax Code Maintenance
─────────────────────

The message given when a tax code is selected for deletion has been
updated to "It is strongly recommended that you never delete tax
codes, as there may be existing or historical transactions that use
the code".

Purchase Order Enquiry
──────────────────────

Enquiring on orders by Purchase Orders, All Orders, Order Details then
Stock returns to an orders window that is blank apart from the
manufacturer which shows a partial date.

This GSP is part of the following Group

ZM60_000007_000   Automatic Allocation of Debtors Ledger Payments

This service pack makes the following enhancement:

Start Up
────────

The requirement is to enhance the allocation of payments so that
payments are automatically allocated in cases where the payment value
exactly matches either the entire or part of the accounts cumulative
balance.

This introduces a new Automatically allocate unallocated payments
parameter in Debtors Ledger. When this parameter is set, the
allocation process checks to see if it has been invoked for an
unallocated payment. if so it checks the payment amount against the
cumulative balance of the account. If the payment value exactly
matches the cumulative balance (at any stage) then the transactions up
to the point at which the match occurs are automatically allocated.
The user can then edit the allocations if required.

The comparison of the payment amount against the cumulative balance is
done in two passes, the first pass compares the payment amount with
the cumulative balance of all transactions regardless of their type.
If no match is found then a second pass is initiated and this time the
payment amount is compared with the cumulative balance of invoices.

Post Application Text

This GSP has the following Pre-requisites -

ZM   60   6

This GSP is part of the following Group

ZM60_000010_000   Various Fixes

This service pack solves the following problems:

Sales Order Processing Orders by Customer Enquiry
───

This is an enhancement to rationalise the outstanding amount displayed
in the Orders by Customer enquiry in SOP with the amount used for
credit checking.
A new column has been added in the Orders by Customer enquiry window
to show the outstanding balance, with or without the net uninvoiced
amount included, depending on whether the credit checking options flag
to include outstanding orders is set.

Order Enquiries
────────────────

The requirement is to implement a "Find" option in Order Book
Enquiries.
Orders by Customer in Order Book Enquiry does not provide any
facilities to enquire on orders of a particular status, it displays
all orders of the selected type whether in progress, completed or
archived.
This covers extending the Order Book enquiry to offer a Find option
similar to that available in Debtors and Creditors enquiries for
finding transactions.

Batch Reference and Serial Number Enquiries
───

This enhancement extends the Batch Reference and Serial Number Enquiry
windows to include a Find button and a Movements button.

The Find button allows text fields associated with the batch or
serial number to be searched for specified text, similar to that
available in Debtors and Creditors enquiries for finding transactions.

The search can be limited by a selection of stock status.

Reporter Copy Library
─────────────────────

This service pack includes the latest version of the report copy
library S.PRINT.

The Movements button displays stock movements for the line selected.

Sales Order Processing
──────────────────────

This is a significant enhancement to the delivery processing
facilities provided by Global 3000 Sales Order Processing. The new
feature referred to as Combined Deliveries can be operated as an
alternative to, or in parallel with, the existing order based picking,
delivery and invoicing facilities provided by Global 3000 Sales Order
Processing.
Combined Deliveries introduces the ability to print an individual
picking list, combined delivery note and covering invoice for multiple
sales orders on a selected customer account. The feature is available
for specifically selected customer accounts and can be overridden for
specific orders on those accounts during sales order entry to cater
for special order deliveries.

ZM60_000017_000   Allow Allocation Of Unposted Invoices.

This service pack solves the following problem:

Allow Allocation of Unposted Invoices [gx16417]
───

This enhancement introduces a new system parameter which controls
whether unposted invoices can be manually allocated during transaction
entry. In order for an unposted invoice to qualify for allocation both
it and the transaction it is being allocated against must be in base
currency and it must not be subject to settlement discount. Unposted
invoices cannot be selected in the Items in Batch window when
entering an allocations batch. When auto-allocating items or when
allocating a range of items unposted invoices are ignored. Please
note, if the value of an unposted invoice is amended after it has been
allocated, then all the allocation details are removed from the
unposted invoice and the details of the allocation of the unposted
invoice are removed from any transactions to which it has been
allocated.

Post Application Text

This service pack should be applied with service packs:
ZP60_000016_000, ZD60_000013_000.

ZM60_000018_000   Daybook Summary Reprints Fix

This service pack solves the following problem:

S.PRINT [gx13468]
─────────────────────

This service pack includes the latest version of the reporter copy
library S.PRINT.
This removes the balance figures from the daybook summary report when
it is printed for a daybook in a prior period or a daybook number
range which includes daybooks in prior periods.
If daybooks from a period prior to the current open period are
included in a summary print, the report shows totals for invoices,
payments etc, but not the brought forward balances. The first column
shows the totals from the selected range of daybooks, the second and
third columns show totals in the current and next period respectively,
and the final column shows the totals in the year to date up to the
end of the current period.

ZM60_000020_000   Enhancement to Customer/Supplier Search

Inactive Accounts [gx15044]
────────────────────────────────
This enhancement introduces a new setting within customer/supplier
maintenance. The new setting holds an accounts status and can be
either Active or Inactive .
Inactive accounts are automatically excluded from account searches and
account enquiries and a button has been added to these windows to
allow Inactive accounts to be included in the list.

Please note, all existing accounts are assumed to be Active until
they are specifically set to Inactive .

ZM60_000022_000   Address Lookup & Sort Code Validation.

This service pack makes the following enhancements:

Cash Book Control Accounts Maintenance [GX160612]
───

This is an enhancement of Global 3000 to introduce the use of Postcode
Anywhere to provide validation of bank sort codes and account numbers.
(Postcode Anywhere provides access to UK and international addresses,
bank data, maps, lifestyle and geographic information. See
http://www.postcodeanywhere.co.uk.)
You may click a button when entering bank details to enter the sort
code and the account number for validation. The sort code, account
number, bank name and branch are returned to the original window.
Refer to the service pack enhancement notes for full details.

Location Maintenance [GX160612]
───────────────────────────────

This is an enhancement of Global 3000 to introduce the use of Postcode
Anywhere to provide address lookup based on postcode. (Postcode
Anywhere provides access to UK and international addresses, bank data,
maps, lifestyle and geographic information. See
http://www.postcodeanywhere.co.uk.)
Wherever addresses are entered, you may click a button and enter a
postcode to display a list of the addresses in that postcode. Select
an address and the details are returned to the address fields in the
original window.
Refer to the service pack enhancement notes for full details.

Colour Usage [GX16637]
──────────────────────

Account Enquiries and Search windows have been enhanced to highlight
accounts based on their status. Inactive accounts will now be
highlighted in red whereas suspended accounts will be highlighted in
yellow.

If an account balance exceeds its credit limit then this will be
highlighted in red.

ZM60_000023_000   Enhancements to POP enquires and various fixes

Interfaces with Manufacturing modules
───

This enhancement contains changes for proposed interfaces with
Manufacturing modules.

Enhancement to P.O.P. Enquiries [D16586]
───

This enhancement introduces new buttons to the Uninvoiced Receipts and
Invoiced Receipts windows within P.O.P. enquiries. The new buttons
are:

Queue entries (Queued items only.) Select this to display stock
queue entries for the receipt.

Shipments (Only if Landed Costs is in use.) Select this to list the
shipment lines assigned to the receipt.

Tax analysis (Invoiced Receipts Enquiry Only.) Select this to
display the net and tax details of the invoice this receipt has been
matched against.

Serial numbers - (Only if the product is serialised.) Enquire on
serial numbers for this receipt.

Product Maintenance [D16658]
─────────────────────────────────

When creating a new product, in the Sales Window the default for
'Print on Delivery Notes' should be Y.

ZM60_000026_000   Enhancement to bank details to hold BIC and IBAN

This service pack provides the following enhancement:

Hold BIC and IBAN in bank details [16435]
───

This service pack forms part of a set, which extends the bank details
held in Global 3000 to hold BIC (Bank Identification Code) and IBAN
(International Bank Account Number) for customers, suppliers and cash
books.

The modifications to Ledger Maintenance are:
───

To maintain the BIC and IBAN with the company cash book bank details.

To allow a cashbook to be marked as the default from which the BIC and
IBAN to be printed on cross-border invoices is to be taken.

Post Application Text

Program DS435 supplied with this service pack must be run to set ISO
country codes

ZM60_000028_000   Various Fixes & Enhancements

This service pack fixes the following problems and makes the following
enhancement:

Product Maintenance [D16733]
──────────────────────────────

When amending a products supplier/product details, an EXIT 1 can occur
if the unit code specified for the suppliers pricing unit or quantity
unit has been deleted.

Internal Purposes
──────────────────

Various items have also been included in this service pack for
internal purposes.

Manual Consolidation In Debtors & Creditors Transaction Entry
[GX16073] [D15997] [D16231]
──

──────────────────────────

This service pack contains an enhancement to Transaction Entry in
Debtors and Creditors Ledgers, which allows payment type transactions
to be manually consolidated for posting to Cash Manager.
While entering a payment or refund batch you can define the
transactions which will be posted to Cash Manager by means of a number
and a description and select a Cash Manager posting in which to
include the transaction being posted.
Note: This feature makes use of the FR record set in the PARAS
database. Thus once it is enabled, every payment or refund batch will

require at least one FR record.

Post Application Text

This service pack should be applied with service packs:
ZC60_000019_000, ZD60_000027_000, ZP60_000029_000.

ZM60_000030_000   Spurious messages amending non-stocked products

This service pack fixes the following problem:

Product Maintenance [16788]
───────────────────────────────────

The spurious messages "Warning: The number of decimal places has been
increased for costing accuracy" and "Warning: The stock revaluation
function should be used to apply the new cost to existing stock" are
displayed when amending a non-stocked product with non-zero decimal
places.

ZM60_000035_000   Extend Report Criteria In Debtors & Creditors

This service pack makes the following enhancement and solves the
following problem:

Extend Report Criteria [GX16656]
─────────────────────────────────

This extends the report criteria on DL and CL reports to incorporate
those available in Aged Debt and provide new ranges and sequences. The
reports affected are Aged Debt/Aged Transactions, Period Postings,
Open Transactions, Customer/Supplier Turnover and Transaction History.

Currency Parameters [D16443]
──────────────────────────────

The expiry date cannot be changed from "- None -" to a date.

Post Application Text

This service pack should be applied with service packs:
ZD60_000035_000 and ZP60_000034_000.

ZM60_000036_000   Goods Receipt Of Batch-Tracked Products.

This service pack solves the following problem:

Purchase Order Processing Goods Receipt [D16552]
_____

For batch-tracked products, in the Table of Batch Details window, a
line can be entered with a negative quantity or a quantity that is a
fraction of a stock unit. A quantity greater than the remainder is
allowed which results in the Number of Entries field in the Generate
Table Entries window being displayed as "********".

ZM60_000039_000   S.O.P. system parameter renamed

This service pack fixes the following problems:-

Sales Order Processing [GX16764]
_____

If the system parameter Customer delivery confirmation required? is
set, the user must record that the customer has confirmed that the
order has been delivered before the invoice can be printed. A window
entitled Confirm deliveries is provided to do this, and delivery
notes which require this confirmation are listed in this window when
they are printed for the user to mark those for which confirmation has
been received.

The problem is that if an order is unconfirmed or unpicked it still
appears in the Confirm Deliveries window.

This service pack also renames the above function as Customer Receipt
Confirmation, or Receipt Confirmation for short, to avoid any
confusion with the Despatch Confirm function, which records that stock
has been issued to an order and General Ledger postings made.
Unqualified references to confirmed orders or lines throughout the
system always refer to Despatch Confirmation.

A further ramification is that the Confirm Requisition Receipt
function has been renamed Complete Requisition.

ZM60_000040_000   Various Fixes & Enhancements.

This service pack solves the following problem and makes the following
enhancements:

Revised Cash Manager Postings [GX16817, GX16823]
───

This contains revisions to the Cash Manager Postings windows used in
the Batch Entry and Items in Batch windows of Transaction Entry in
Debtors Ledger and Creditors Ledger.
The revisions resolve a number of display and dialogue problems by
using a simplified "Cash Manager Postings List" window in Items in
Batch in place of the "Cash Manager Postings" maintenance window. The
"Cash Manager Postings" maintenance window continues to operate from
the "CM Postings" button in the Batch Entry window of Transaction
Entry. They also remove the CM Postings option from the Creditors
Ledger Auto-payments which was deemed misleading.

Customer & Supplier Notes [GX16756]
─────────────────────────────────────

This change replaces the Speedbase windows used to process free format
sets of notes with a standard Windows text-edit window. Currently
Global 3000 maintains customer and supplier notes via various windows
that simply list the notes for a specific customer or supplier. With
this change applied the display and update of these notes occurs
within a standard Windows text- edit control, when used in conjunction
with SQL format Speedbase databases.
This control has the advantage of incorporating all the standard
Windows text editing features including word wrap and cut and paste.
Native database format installations will continue to process notes
using the original Speedbase windows.

New Sales Order Processing Transaction Desktop
───

This service pack introduces the new Transaction Desktop for Global
3000 Sales Order Processing.

Please note, the transaction desktop included in this service pack is
for reseller evaluation only and as such cannot be used at end user
sites. After the evaluation period has concluded a final version of
the Transaction Desktop will be released in a subsequent service pack.

The Transaction Desktop is fully compatible with the traditional
version of Global 3000 Sales Order Processing Transaction Entry. It
can be activated on a per operator basis and is designed to minimise
retraining overheads and facilitate take-up by sites already using
Global 3000 Sales Order Processing.

In addition to the operating advantages inherent in open desktop
operation, the new format introduces the following new features not
provided by the traditional transaction entry dialogue:-

1. Individual desktop profiling for each operator,

2. Creation of new customer accounts directly from the desktop,

3. Customer find incorporating latest address & post code look-up,

4. Entry of different transaction types without leaving the desktop,

5. Access to customer, transaction and product enquiries at any time
without leaving the desktop,

6. Created by & last amended by operator information added to header
details,

7. Product find to aid locating products during line entry,

8. Price, pricing unit & line value displayed for each line in the
scrolled section of the desktop,

9. Minimal dialogue input during initial transaction and transaction
line entry, items are only prompted for in cases where a default is
not available.

The service pack also supplies a new version of the Sales Order
Processing menu file, SO-Menus, that includes a Desktop option in the
main menu.

Please note, this service pack contains various programs that will be
required when the final version of the Transaction Desktop is
released, as such it must also be applied at all end user sites.

ZM60_000041_000        BIC and IBAN Upgrade.
```

This service pack merely updates the V5.0 to V6.0 Upgrade facility and
will not affect any installed V6.0 software:

BIC and IBAN [GX16435]
───────────────────────────

The upgrade from V5.0 to V6.0 has been updated to transfer the BIC and
IBAN codes that have been introduced by the enhancement made by
service packs ZM50_000110_000, ZP50_000160_000, ZD50_000151_000,
ZS50_000103_000 and ZC50_000071_000 for V5.0 and ZM60_000026_000,
ZP60_000027_000, ZD60_000024_000, ZC60_000018_000 and ZS60_000017_000
for V6.0.
From 1st January 2006 European banks may levy higher bank charges on
corporate customers whose cross-border transactions in Euros do not

conform to BIC (Bank Identifier Code) and IBAN (International Bank
Account Number) data formats. From 1st January 2007 banks can reject
such transactions and also charge customers for the return of the
transaction less the fee levied. This indicates that the use of BIC
and IBAN may become mandatory in the future.
The implication for Global 3000 is that BIC and IBAN should be made
available on all documents relating to cross-border transactions.
This is done by holding BIC and IBAN with bank account details for
companies, suppliers and customers, and printing them when
documentation relating to cross-border transactions is produced. BIC
and IBAN for suppliers are printed on autopayment documents and
supplier list in Creditors Ledger. BIC and IBAN for customers are
printed on the session banking report and customer list in Debtors
Ledger. The company's BIC and IBAN are printed on cross-border
invoices by Sales Order Processing so that customers can supply them
to their bank with the payment. BIC and IBAN are printed on the Funds
Transfer document in Cash Manager.

Automatically back order products for a customer [GX16442]
───

Automatically back order products for a customer
This service pack provides the option to always put pooled product
lines on back order for a selected customer at the time they are
entered.
The Yes and No responses to the option to Allow back orders have
been replaced by three responses Allowed, Not allowed and
 Always. The option occurs in the customer defaults section of system
parameters, in the SOP details on customer accounts and on each sales
order header.
The setting in system parameter customer defaults is offered when
creating new customer accounts. The setting in customer account SOP
details is put onto the sales order header when creating new sales
orders for the account. The setting on the sales order header can be
modified and controls whether or not pooled products are put on back
order or are allocated from free stock when lines are added to the
sales order.
Lines for pooled products added to a sales order with this option set
to Always are automatically put on back order, in the same way as
they would be if the product involved was set to Always back order.
Once entered, order lines are allocated and amended in the normal way.
Please note that this option is not available if the system is
configured to over commit stock or to reduce the order quantity in the
case of insufficient stock. In addition, the feature only operates for
pooled products and is ignored for queued products.
NB: This enhancement will also soon be available on the Sales Order

Processing Transaction Desktop.

CM Postings From CL & DL Transaction Entry [D17056]
───

Deleting a Cash Manager Postings record from the Cash Manager Postings
window in Creditors and Debtors Transaction Entry causes the program
to loop.

Stock Allocations Enquiry [D16748]
──────────────────────────────────

In Stock Details of Product Enquiries, selecting Sales Orders from the
Allocations window closes the Allocations window and selecting the
Close button displays the Sales Orders Allocations.

ZM60_000061_000   SOP Transaction Desktop + other SOP Enhancements.

This service pack makes the following enhancements:

New Sales Order Processing Transaction Desktop
───

This service pack introduces the new Transaction Desktop for Global
3000 Sales Order Processing.

The Transaction Desktop is fully compatible with the traditional
version of Global 3000 Sales Order Processing Transaction Entry. It
can be activated on a per operator basis and is designed to minimise
retraining overheads and facilitate take-up by sites already using
Global 3000 Sales Order Processing.

In addition to the operating advantages inherent in open desktop

operation, the new format introduces the following new features not provided by the traditional transaction entry dialogue:-

1. Individual desktop profiling for each operator,

2. Creation of new customer accounts directly from the desktop (this feature can, optionally, be password protected),

3. Customer Find incorporating latest address & post code look-up,

4. Entry of different transaction types without leaving the desktop,

5. Access to customer, transaction and product enquiries at any time without leaving the desktop,

6. Created by & last amended by operator information added to header details,

7. Product Find to aid locating products during line entry,

8. Price, pricing unit & line value displayed for each line in the scrolled section of the desktop,

9. Minimal dialogue input during initial transaction and transaction line entry, items are only prompted for in cases where a default is not available.

Product Search [gxidc17061 - D17063]

A new button labeled Prices has been added to the standard product search, available when the search is invoked from the SOP Transaction Desktop. Pressing the new Prices button displays the prices available to the customer (for whom the SOP transaction is being entered) for the currently highlighted product, Selecting a price list entry automatically selects the currently highlighted product and applies the price to the transaction line on the SOP Transaction Desktop.

Standard Sales Order Search [gxidc17061 D17067]

The standard sales order search has been enhanced to include a Find button. The criteria used to search for SOP transactions (when the Find button is pressed) have been extended to allow text to be searched for within delivery and invoice addresses.

Quick Customer Creation [gxidc17061 D17061]

The creation of new customer accounts within SOP can now be disabled or password protected if required, see SOP Parameters Customer Defaults.

Internal Purposes [D17147]

This change has been made for internal purposes only, however this
service pack must still be applied.

Trade and Industry Discounts [GX17002]
──

This enhancement allows S.O.P. to be configured (via new system
parameters within the S.O.P. system parameters Order Entry/Discount
Options) to suppress trade, quantity and/or industry discounts on
transaction lines for which a special price (i.e. a price from a
special price list) has been used.

ZM60_000063_000   Non-Batch Tracked To Batch Tracked

This service pack makes the following enhancement:

Product Maintenance [GX17086]
─────────────────────────────

This service pack contains an enhancement to Global 3000 distribution
software which allows batch tracking to be switched on for products
which have previously been operated as non-batch tracked.
In FIFO costed environments and for serially numbered products batch
tracking is simply switched on and the batches previously generated by
the system to reflect receipts and drive FIFO costing and serial
number control become part of the batch track for the affected
products.
In weighted average or standard costing environments, for non-batch
tracked, non serially numbered products which are managed by Global
3000 distribution software using a notional batch zero per location,
all references to batch zero are replaced on affected databases by the
number of a batch generated for that location. This can only be done
if all delivery lines for the product in Sales Order Processing have
been invoiced.

```

This service pack makes the following enhancement:

Creditors and Debtors Month End [GX16234]

This service pack introduces a new Month End function in Creditors
and Debtors. The new function performs all checks to ensure that a
period can be closed (i.e. all batches are posted, the daybook has
been printed, the session has been closed and all GL analysis has been
posted). Once these have successfully completed, it lets you choose
which period end functions are to be to run and then runs them for you
without further instruction. This makes it possible for you to perform
the period end functions and complete the period closure from a single
screen.

ZM60_000077_000   Enhancement to allow product selection by barcode.

Barcode Integration [GX16613]
───────────────────────────────

This service pack contains an enhancement to Global 3000 distribution
software which allows product code entry/selection to be made by
 scanning (or typing) a product s barcode.

The changes are:

Product maintenance has been updated so that as part of creating or
maintaining a product a 40 character barcode can be specified.

Product code entry/selection has been updated to check to see if a
barcode has been scanned (or typed) instead of a product code; it
searches the product records for a product with a matching barcode and
automatically selects it. Product code entry/selection can be made by
 scanning (or typing) a product s barcode at the product code prompts
in the application functions:-

        Stock Control Transaction Entry,
        Stock Control Stock Take,
        Stock Requisition Entry,
        Purchase Order Entry,
        Purchase Invoice Input (the addition of services and extras),
        Purchase Order Processing Supplier/Product Maintenance,
        Sales Order Processing Transaction Desktop,
        Sales Order Entry,
        Manufacturer Works Order Entry,
        Product Enquiries,
        The standard product search.

Please note: Some barcode scanners supply the scanned barcode in upper
or lower case depending on the state of <Caps Lock> key, to combat
this barcodes will be held on file in upper case, and the applications
always convert the scanned barcode into upper case before attempting
to search for products with matching barcodes.

Please also note: Barcode scanners connected via the RS-232 serial
port are not supported.

ZM60_000078_000   Two enhancements to manufacturer and various fixes

Two enhancements to Manufacturer and various fixes
───

Trial kitting report/enquiry
────────────────────────────

The option to print or display in-progress works orders for the
product being kitted has been added [17359].

The wrong component stock levels are calculated when performing
consecutive trail kitting enquiries or reports that use the same
components in the same session [17351].

The wrong quantity of components is being printed/displayed if the
unit of the product being kitted is changed from the default stock
unit [17348].

Issue components

Wrongly sized border displayed on window [17358].

Wrong cost price calculated when unit cost price calculated as less
than 0.01p [17355].

New parameter to force the batch and/or serial number windows to
always be displayed prior to confirmation to allow additional checking
before issuing components. This mirrors the confirmation process used
in SOP [17354].

Installation
─────────────

After installing Manufacturer, the dialogue that prompts you to create
a new SQL database, incorrectly prompts you for a "PRD" unit
assignment [17350].

Parameter Maintenance
───────────────────────

Spelling mistake [17347].

ZM60_000079_000   Enhancement to S.O.P. Printer Assignments

System Parameters   Printer Assignments [gx17345]
───

This service pack enhances the printer assignments that can be defined
within system parameters. Printer assignments for SOP Invoices and
Credit Notes can now be specified independently. In addition a printer
assignment can now be specified for SOP Labels.

Please note, after applying this service pack at existing sites, the
printer assignment for SOP Credit Notes will default to that for SOP
Invoices whilst the printer assignment for SOP Labels will default to
unit $PR. For new sites all printer assignments will default to unit
$PR.

ZM60_000080_000   Enhancement to menu files.

Menu Files [gx15440]
─────────────────────

The standard menus for all Global 3000 software packages installed at
a site (with the exception of Global 3000 Payroll) can now be held on

a single central unit G3M instead of the data unit of their
associated module. After applying this service pack, menus are loaded
from logical unit G3M if it is assigned. If unit G3M has not been
assigned when the application is run the menu will be loaded from the
data unit of the module being run (e.g. if running Stock Control and
unit G3M is not assigned the menu file is loaded from unit STD).

Note, if you are not using customised menus, the need to manually copy
menu files to the modules data unit after applying a service pack
containing an updated menu file can be avoided by assigning unit G3M
to the software s program unit ($P).

ZM60_000082_000   Profit Centres For Purchased Services & Extras.

This service pack solves the following problem:

Sites using POP Default profit centre for costs other than stock

This service pack introduces a new Purchase Order Processing system
parameter "Default PC for purchased services and extras from ordering
location?". The service pack modifies Purchase Order Line Entry and
Purchase Invoice Entry of Services and Extras to take the default
profit centre for services and expenses added to purchase orders from
the blank location rather than the ordering location if the new
parameter is switched OFF and no other cost method has been activated
for the data entry session.
The new system parameter is switched ON automatically when this
service pack is applied, i.e. the default profit centre is taken from
the ordering location for extras and services added to purchase
orders. To default the profit centre from the blank location for
service and extras added to purchase orders, use system parameter
maintenance to switch the new parameter OFF.

ZM60_000084_000   Stock Enquiry Menu.

This service pack solves the following problem:

Stock Enquiry Type menu [GX16775]
─────────────────────────────────

The Stock Enquiry Type menu is available from Stock Control, Sales
Order Processing, Purchase Order Processing and Landed Costs. It is
not clear which of these enquiries should be suppressed when certain
modules are not configured. In particular, the Customer and Supplier
enquiries show Customer and Supplier information in relation to
products (price lists, orders, invoices etc.) and are not relevant if
Sales or Purchase Order processing are not configured. This service
pack suppresses the Customer and Sales Order options if Sales Order
Processing is not configured and suppresses the Supplier and Purchase
Order options if Purchase Order Processing is not configured.

ZM60_000085_000   Enhancement to GL Auto-Entry Report.

GL Auto-Entry Report [gx17411]
─────────────────────────────

This service pack enhances the sequence options available when the
General Ledger Auto-Entry report is printed (during auto-transfer) in
standard width format. It is no longer automatically printed by
company, profit centre and account code, it is now possible to
sequence the report as follows:

By General Ledger account. Print transactions posted to each General
Ledger account in ascending sequence (sorted by date). Transactions
are sequenced by company, profit centre and account code.

By Originating batch and item. Print transactions posted to General
Ledger in ascending sequence of the sending system daybook batch and
item numbers (sorted by date). This option is useful for audit
trailing between General Ledger and the other Global 3000 financial
modules. It should be noted that postings from Global 3000 Stock
Control appear with the batch and item number set to zero.

By Original order number. Print transactions posted to General Ledger
in ascending sequence of their sending system order numbers (sorted by
date). This option is useful for reconciling postings at Purchase

Order Goods Receipt with Purchase Invoice postings which come to
General Ledger via Global 3000 Creditors Ledger.

By Document reference. Print transactions posted to General Ledger in
ascending document number sequence (sorted by date). This option is
useful for sorting out postings that arise at different points in the
business cycle but which are cross-related by document reference; for
example re-classification of stock.

In addition to the above a new option Group consolidated transactions
together has been added. When this option is selected, transactions
posted to a single consolidated General Ledger transaction are printed
at the end of the report regardless of the sequence option selected
above.

Please note, when on-line posting auto-transfer acts as if the above
option Group consolidated transactions together has been selected.

Enhancement to allow Cost of Sales account modifiers
_____

_____

Cost of Sales account modifiers [D17363]
_____

This service pack introduces an enhancement to SOP that allows
postings to the cost of sales account to be modified on a per customer
basis. Two new fields have been added to customer maintenance that
allows a modifier to be entered for the profit centre and/or account.

For example, sales of product GAL01 in the SOP sample data are
normally posted to STH/A1001. (The profit centre is taken from the
sales location and the account from the product group.) With the cost
of sales modifiers set to N?? and ????2 however, sales of GAL01
are posted to NTH/A1002 for the customer in question.

ZM60_000089_000          Enhancement to Customer and Supplier Notes

Customer and Supplier Notes [GX16882]
────────────────────────────────────────
```

This service pack enhances Debtors Ledger and Creditors Ledger.
Currently customer and supplier notes are automatically amended and
edited using Windows based text editing when data is held in SQL
format databases. The enhancement introduces a new system parameter
(within administration parameters/operating options). The new system
parameter governs the format in which customer and supplier notes are
held, the options available are either Windows format (this has the
advantage of incorporating all the standard Windows text editing
features including word wrap and cut and paste) or 'Standard
format (notes are processed using the existing speedbase windows). A
conversion program is automatically run whenever the parameter s
setting is changed, this will reformat all customer and supplier notes
to match the selected format. Native database format installations
will continue to process notes using the original Speedbase windows

Please note, to ensure that the data is in a consistent state and that
the parameter is set correctly the conversion program will be run the
first time a Debtors Ledger, Creditors Ledger or System Parameters
program is run after these changes are installed.

Please also note, when entering notes in Windows format the size of
the notes entered is limited to 32,500 characters (this is equivalent
to 650 lines of notes in Standard format).

ZM60_000090_000   Date Format In Currency Parameters.

This service pack solves the following problem:

Currency Parameters [D17443]
─────────────────────────────────────
When maintaining rates in Currency Parameters, the dates cannot be

entered as digits alone, e.g. 010107. It has to be entered as 01/01/07
or it is rejected as an invalid date. This change allows the dates to
be entered as digits alone.

ZM60_000091_000   Enhancement to System Parameters - System Codes

System Parameters (System Codes) [gx17384]
──
When deleting a system code you now have the option of checking to see
if it has been used, for example when deleting a delivery code the
system can check to see if the delivery code about to be deleted has
been recorded on any sales orders or delivery notes. This check is
optional, however it should be noted that if a system code which is in
use is deleted its description will no longer be available for
enquiries and reports.

Enhancements to manufacturer assembly bill enquiry
───

Estimated costs [17504]
─────────────────────

When viewing an assembly bill, the estimated cost of each component
line is now displayed in addition to the estimated total cost of the
whole assembly.

Sub-assembly components [17492]
───────────────────────────────

When viewing an assembly bill, component lines that are in fact
sub-assemblies and have their own assembly bills are now highlighted.

This GSP is part of the following Group

ZM60_000093_000   Various Enhancements to POP and SOP

Various enhancements to SOP and POP
───────────────────────────────────

Purchase Order Enquiries [D17507]
─────────────────────────────────

In some cases whilst enquiring upon purchase order lines, pressing the
'Stock' button shows the purchase order header details rather than the
stock details.

Manufactured Goods Enquiry [D17494]
───────────────────────────────────

A new "Manufactured Products" option is now available at the product
type selection menu that appears after selecting Stock Enquiries. This
option restricts the enquiry to manufacturable products only.

Supplier Price Lists in POP [D17338]
─────────────────────────────────────

This enhancement introduces the ability to define a supplier price
list for products ordered through POP or Landed Costs. A new "POP
Price Lists" parameter is available to configure the way pop price
lists are used.

A new "Price List" sub-menu contains all the price list maintenance
and report functions.

Increased pricing accuracy in POP [D17337]
───

This enhancement introduces the ability to define the pricing accuracy
to be used on all products within a selected product group. A unit
price can now be defined as having between two and six decimal places.
It should be noted that the total line values (total value posted to
GL and CL) is still limited to the number of decimal places that are
valid for the currency of the order.

The increased pricing accuracy is used in POP price lists, last quoted
cost and last invoiced cost.

S.O.P. and P.O.P. Posting Options [gx17390]
───

This service pack introduces a new parameter screen to P.O.P., the new
parameters enable you to control the narrative and comment lines used
on Creditors Ledger transactions, General Ledger Analysis (of
Creditors Ledger transactions) and General Ledger transactions (for
cost variance when posted to the stock value account) posted from
P.O.P. Invoice Input.

It also enhances the Debtors Ledger Narrative window within S.O.P.
Invoicing parameters. This window has been re-titled Posting Options
and enables you to control the narrative and comment lines used on
Debtors Ledger transactions, General Ledger Analysis (of Debtors
Ledger transactions) and General Ledger transactions posted from
S.O.P. Invoice Print.

Product Maintenance [D17532/D17533]
───────────────────────────────────

In some cases, when a product is deleted its assembly bill details are
not.

ZM60_000094_000   System Code Amendment.

This service pack makes the following enhancement:

System Parameters (System Codes) [GX17506]
_____
When amending the description for a system code you now have the

option of checking to see if it has been used, for example when
amending the description for a delivery code the system can check to
see if the delivery code about to be amended has been recorded on any
sales orders or delivery notes. This check is optional, however it
should be noted that if the description for a system code is changed
its previous description will no longer be available for enquiries and
reports. Enquiry screens and reprints of reports/documents will show
the new description.

ZM60_000098_000   Enhancement to DL Aged Debt/CL Aged Transactions

Export DL Aged Debt Report/CL Aged Transactions [GX17523]
_____

This enhancement introduces new lines to the Reports and Statistics
menus within Debtors Ledger and Creditors Ledger.
The new options are named Export Aged Debt (for Debtors Ledger) and
'Export Aged Transactions' (for Creditors Ledger). They allow a
summary Aged Debt/Aged Transaction report to be exported to a CSV file
which consists of a single line containing column headings followed by
a single line per customer/supplier. Each line is terminated with
either #0D or #OD0A depending on the operating system.

Please note, the Debtors Ledger menu file has been updated to add a
new option to the Reports and Statistics Menu (Export Aged Debt).
Please copy DL-Menus from your program unit ($P) to your data unit
(DLD) after applying this Service Pack. This step is not required if
service pack ZM60_000080_000 has been applied and unit 'G3M' has been
assigned to your program unit ($P).

Please also note, the Creditors Ledger menu file has been updated to
add a new option to the Reports and Statistics Menu (Export Aged
Transactions). Please copy CL-Menus from your program unit ($P) to
your data unit (CLD) after applying this Service Pack. This step is

```
not required if service pack ZM60_000080_000 has been applied and unit
'G3M' has been assigned to your program unit ($P).

ZM60_000099_000         Global 3000 Recovery Suite

Global 3000 Recovery Suite [17527] [17568]
```

This service pack contains the complete suite of Global 3000 v6.0
recovery programs and includes a new option to delete a company from
Cash Manager. The whole suite has been included in the service pack
since the Recovery suite was not previously maintained as part of ZM
and it is possible that some sites do not already have it installed.

Note that there are separate options to remove a company from
Creditors Ledger, Debtors Ledger, Cash Manager and General Ledger. The
General Ledger deletion should always be run last as this gives the
option to remove company information which is required for the other
deletions from the PARAS database.

ZM60_000105_000          Enhancement to standing orders and repeating order
```

This service pack provides three enhancements to Cash Manager
[gx16899]

1) A new Repeating Order. This is entered like a Standing Order but a
current period transaction can be generated from it at any time.
Transactions are not automatically generated by Close Period.
2) The ability to generate Standing Order transactions for the current
period from a standing order starting in the current period.
3) The ability to enter a taxable Standing or Repeating Order if tax
analysis is in use in Cash Manager

In addition the dialogue for Standing Order/Repeating Order Entry is
brought into line with that for Transaction Entry.

This GSP is part of the following Group

ZM60_000109_000   Enhancement to BACS file creation.

BACS File Creation [GX17393]
────────────────────────────

This service pack enhances Creditors Ledger Auto-payments. BACS
payments files are now generated directly by Creditors Ledger removing
the need to use the Global BACS module.

A new option allowing BACS parameters to be set up has been added to
the bank details window within Company Parameters/Cash Book Control
Accounts. These new BACS parameters must be established for each Cash
Book Control Account from which BACS payments are to be made before
BACS payments can be generated within Creditors Ledger Auto-payments.

Please Note: If BACS payments have been generated for an open
auto-payment run when this service pack is applied, those BACS
payments must be processed using the Global BACS module.

For further information please see the enhancement note accompanying
this service pack.

ZM60_000110_000   Stock forecast enquiry

Transaction Desktop   Stock Forecast Enquiry [gx17586]
_____

This enhancement introduces a new button to the Transaction Desktop,
Product Enquiries and Stock Enquiries. The button (labelled Stock
Forecast) is located within the Enquiry Options Window (accessed via
the Enquiry button on the main Transaction Desktop window), the
options window which appears after selecting a product during Product
Enquiries and the main Stock Enquiry window.

The Stock Forecast enquiry details future supplies and demands of a
selected product. It can be limited by location and/or date. The unit
in which the quantities are shown is also selectable.

If you are currently viewing, adding or amending a transaction line
(for a stocked product) within the Transaction Desktop the Stock
Forecast will be shown for the product and location specified on that
line, if not then you can specify the product and location within the
Stock Forecast window itself.

For further information please see the accompanying enhancement note.

ZM60_000124_000   Enhancement to provide calendar look-up.

Calendar Look-up [GXIDC17525]
_____

This enhancement introduces a calendar look-up to the majority of date
prompts within Asset Register, General Ledger, Cash Manager, Debtors
Ledger and Creditors Ledger.

If you wish to enable this feature please see the enhancement note
included with this service pack.

Important Note: This service pack requires GSM run-time version GSM
SP-23, or later. The GX.EXE version must be V4.3, or later. These
versions are required after applying this service pack even if you do
not wish to use the calendar look-up feature.

```

ZM60_000125_000   Enhancement to long description processing

Enhancement to long description handling [16534]

This service pack fixes problems in Sales Order Processing and
Purchase Order Processing.

In SOP, if the user selects order line comments the long description
lines are copied from the product and attached to the order line. If
the user then deletes these comments they are still printed on the
order if the "Copy long descriptions to order?" flag is set.

In POP there is a conflict where the above parameter in Sales Order
Processing is being used to control the printing of packaging
instructions on Purchase Orders.

Recovery program D16534 which sets the parameters and (optionally)
copies the product long descriptions to existing order lines on open
orders is provided in this service pack. This should be run when the
service pack is applied.

Note: This function increases the requirement for LD records in
database PARAS.

See the attached enhancement note for further details.

ZM60_000129_000   Prevent on-line posting log file being deleted.

Prevent on-line posting log file being deleted [17811]

The on-line posting log file which resides in the folder OnLineLogs in
the Global System Manager folder is being deleted between transfers.
Thus if an error occurs in posting a batch and it is left in a *POST
state, the on-line log file is added to if the next attempt to post is
a recovery for the same batch, but if a new batch is posted the file
is deleted and recreated. The log file is now extended indefinitely,
and can only be deleted manually.

ZM60_000133_000   Enhancement to allow a Cash Book to be closed.

Close Cash Book [gx17777]
─────────────────────────────────────

This enhancement introduces a new function within cash book
maintenance. The new function allows a cash book to be permanently
closed. A new status field which shows whether the cash book is Open
or Closed has also been added.

Closed Cash Books cannot be chosen as the currently selected cash
book. In addition they are excluded from transaction entry, searches,
enquiries, reports (with the exception of the Cash Book Report) and
revaluation. However, enquiries do provide the option to include
closed cash books.

When a cash book is closed you are prompted to select a replacement
cash book to which the balance is to be transferred (if there is one)
and to be used if Auto-Transfer subsequently detects a posting to the
closed cash book.

Please note, all existing cash books are assumed to be open until they
are specifically closed.

ZM60_000134_000   Suppress delivery location prompt in order entry

Suppress delivery location prompt in order entry[17717]
_____

This service pack enhances Purchase Order Processing for single
location systems.

A new value of the parameter Purchase Order location input which
currently allows At start of session and At start of each order is
made available for single location systems, allowing the option
 Never. If this is set, Purchase Order Entry does not prompt for the
delivery location at all, and inserts the single location address into
the order delivery address. If necessary, this may be changed for
individual orders by selecting the order for amendment.

```
ZM60_000140_000          Enhancement - New GL Journal Batch Report.
```

General Ledger - Journal Batch Report [GX17316]
───

This enhancement introduces a new report to the Financial Reports
menu. The new report is named Journal Batch Report and can be
printed (in both standard and PDF format) or exported. It lists
batches and transactions and can be printed for a single period or a
range of financial periods. The batches to be included can be
restricted to batches created for a selected source module.

When the report is exported a CSV file is created which consists of a
single line per transaction; (page headings, total lines and
underlines are not exported). Each line is terminated with either #0D
or #0D0A depending on the operating system.

Please note, the menu file has been updated to add a new option to the
Financial Reports Menu (Journal Batch Report). Please copy GL-Menus
from your program unit ($P) to your data unit (GLD) after applying
this Service Pack. This step is not required if service pack
ZM60_000080_000 has been applied and unit 'G3M' has been assigned to
your program unit ($P).

Please also note, PDF format based forms require an up-to-date copy of
PDF In-The-BoxTM to be present on the GX client used to perform the
printing.

IMPORTANT NOTE: After applying this service pack program 'ADDGL' must
be run. ADDGL will be available on the program unit after this service
pack has been applied.

Post Application Text

IMPORTANT NOTE: After applying this service pack program 'ADDGL' must

ZM60_000141_000   Enhancement to Close Cash Book Feature.

Close Cash Book [gx17867]
───
This enhancement improves the recently added close cash book function
within cash book maintenance. The improvement allows cash books with a
zero balance to be closed without specifying a replacement cash book.

When a cash book is closed you are prompted to select a replacement
cash book to which the balance is to be transferred (if there is one)
and to be used if Auto-Transfer subsequently detects a posting to the
closed cash book, the replacement cash book can now be left blank if

the cash book being closed has a zero balance.

Please note, if no replacement cash book is specified auto-transfer
will reject any incoming transfer file containing postings to the
closed cash book.

System Code Justification [GXIDC17876]
──────────────────────────────────────

In some cases changing the justification of system codes can cause
problems during data entry, reporting and enquiries. To avoid this,
the system now checks for existing codes when the Right justify
system codes parameter is changed. If the parameter is changed and
system codes exist with the previous justification setting the system
warns the user and asks them to confirm that they wish to proceed with
the change.

ZM60_000147_000   New system parameters for PDF format reports.

New Parameters - PDF Format Print Controls [GXIDC17922]
_____

This service pack introduces a new parameter screen within
Administration Parameters/Operating Options.

The new parameter screen (titled PDF Format Print Controls) contains
settings used to configure and control the PDF Format reports
available within the application. These currently consist of the
Debtors Ledger Aged Debt report, the General Ledger Batch Print and
the General Ledger Journal Batch report with further reports planned
to be updated to include a PDF Format option and subsequently released
in future service packs.

The new parameter screen includes a setting which controls whether the
PDF Format report is to be produced by default (where available), this

setting can be used to resolve problems at sites where   PDF In-The-Box
TM (required to produce PDF format reports) is not present and the
PDF Format report is mistakenly selected.

Please see the accompanying service pack note for further details.

ZM60_000150_000   Improvements to csv exports.

Exported Reports [GX17931]
─────────────────────────────────────

This service pack introduces improvements to the export to csv file
feature available within the General Ledger Reports, the Aged Debt
report and the Aged Credit report. The improvements are as follows:

1) If the export filename does not have a file extension, the system
automatically appends an extension of .csv to the filename.

2) If the export file is being created on the desktop (rather than the
server) a folder browse is always available when specifying the path.

3) A new option has been provided (available if the export file is
being created on the desktop (rather than the server)), it is labelled
 Open file once export completes? . When set the file is automatically
opened once the export completes. The file will be opened using the
3rd party application associated with the file s extension.

In addition, this service pack introduces a new PDF format option for
the General Ledger Report. The PDF format option is selected via the
'Printer' setting in the 'Print Options' window. This option is
released for informal evaluation only.

Please note, PDF format based forms require an up-to-date copy of
PDF-In-The-BoxTM to be present on the GX client used to perform the
printing.

ZM60_000153_000   Delivery of SOP Invoices/Credit Notes via email.

Email Invoices/Credit Notes [gx17853]
_____

This service pack introduces a new function within Sales Order
Processing. The new function allows invoices and credit notes to be
delivered to customers via email.

New system and customer settings have been created to allow the
delivery of invoices and credit notes via email to be configured.

For customers configured to receive invoices and credit notes via
email, invoice/credit note print automatically generates an email for
each document containing the invoice or credit note as a pdf format
attachment file and sends it. This is done when a new invoice or
credit note is selected for printing. Provisions have been made within
invoice or credit note print to generate a printed copy of an emailed
invoice or credit note via the reprint option.

When an invoice or credit note is delivered via email, up to five
additional attachment files can be sent, these can be defined in
system parameters.

Please see the note accompanying this service pack for full details of
the new feature.

Please note, Delivery of invoices/credit notes via email requires an
up-to-date copy of either PDF_In-The-Box or All_In_The_Box to be
present on each GX client used to perform the invoice/credit note
generation.

ZM60_000161_000   GL Trial Balance Export - New Format.

General Ledger Trial Balance Export [GX17929]
_____

This service pack introduces a new format to the GL trial balance
export to CSV file. The new format is labelled Single column .
Selecting Single column will create a CSV file which contains a
single line of column headings followed by a single detail line (per
company, profit centre and account) consisting of the following
columns:

        Company Id
        Profit Centre (omitted if the Consolidate option is
selected)
        Period End date
        Account Id
        Account Name
        Opening Balance (negative for credit values)
        Period Amount (negative for credit values)
        Closing Balance (negative for credit values).

ZM60_000166_000   VAT Reminder Protocol

VAT Reminder Protocol [D18040]
_____

This service pack introduces the VAT reminder protocol allowing sites
to check VAT rates against transaction dates for unexpected
combinations.

The VAT rate change on 1 December 2008 caused concern at some Global
3000 V6.0 sites that transactions dated prior to the cutover date but
added to the ledger after the cutover date might be given the wrong
tax code by default. A lesser degree of concern was expressed that
items dated after the cutover date might be given the old standard
rate of VAT. And finally, some concern was felt that high value
allocations involving taxable transactions either side of the cutover
date would require senior accounting consideration.

This service pack introduces the ability to configure your system to
issue a warning whenever it detects any of the above conditions during
manual entry of transactions in Debtors Ledger or Creditors Ledger.

Please note, to use the new feature you must explicitly switch it on
in system parameters after applying the service pack.

Please see the accompanying service pack note for further information.

ZM60_000167_000   Reseller Transaction Intercepts

Transaction Intercepts [gx18032]
_____

This service pack introduces a new set of intercept points which allow
resellers to include additional processing within Debtors Ledger,
Creditors Ledger and Cash Manager.

Intercept points have been provided after a transaction line (in DL,
CL and CM) has been processed and before a transaction line or batch
is deleted.

Creditors Ledger Auto-payments has been updated to provide an
intercept point after each payment transaction is generated (when the
payment run is posted).

Transaction enquiries (in DL, CL and CM) have also been updated to
provide resellers with intercept points which allow an additional
button (which the reseller must provide a label for) to be included,
enabled/disabled and processed on the main transaction enquiry
windows.

Please see the accompanying service pack note for further details.

ZM60_000169_000   Delivery of customer statements via email.

Statement Print [gx18005/gx14312]
_____

This service pack introduces a new feature in Debtors Ledger. The new
feature allows customer statements to be printed in PDF format and
optionally to be delivered via email. New system and customer settings
have been created to allow the delivery of statements via email to be
configured.

Printing statements in PDF format can now be selected via the Print
Options window at runtime.

For customers configured to receive statements via email, statement
print automatically generates an email containing the statement as a
pdf format attachment file and sends it. This is done whenever a
statement is selected for printing. Provisions have been made within
statement print to generate a printed copy of an emailed statement via
the reprint or individual statement options.

When a statement is delivered via email, up to five additional
attachment files can be sent, these can be defined in system
parameters.

Please see the note accompanying this service pack for full details of
the new feature.

Please note, printing statements in PDF format/the delivery of
statements via email requires an up-to-date copy of either
PDF_In-The-Box or All_In_The_Box to be present on each GX client used
to perform the statement generation.

Please also note, this service pack includes the latest versions of
reporter copy libraries S.PRINT and S.PRINT2.

ZM60_000176_000   Update to Creditors Ledger Logged Invoice Approval

Creditors Ledger Logged Invoice Approval [gx18158]
──

This service pack introduce a new system parameter (CL
Parameters\Operating Options\Transaction Entry Settings) named Logged
invoice approval method , this parameter can be set to either By
Approver or By Supplier .

When set to By Approver , you are prompted for an approver and then
presented with a list of unapproved logged invoices marked for the
attention of the selected approver. Once a logged invoice is selected
for approval you are returned to the items in batch (invoices) window
where the invoice details can be amended if required.

When set to By Supplier , you are prompted for a supplier (unless one
has already been specified) and an unapproved logged invoice. Once an
unapproved logged invoice has been selected its details are displayed

with the option to approve or reject it. If you choose to approve it
you are returned to the items in batch (invoice) window, in this mode
a number of the prompts are initially skipped (although you can go
back and amend them if required). In addition when approving logged
invoices by supplier the GL Analysis window automatically closes once
the balance to analyse reaches zero.

Please see the accompanying service pack note for further details.

ZM60_000184_000   New SOP Option - Order Completion Statistics.

Order Completion Statistics [gx18203]
───

This service pack introduces a new function named Order Completion
Statistics which is available from the Order Enquiries and Reports
menu.
The new function provides the ability to calculate and show the number
of orders completed (i.e. fully invoiced) within a specified number of
days after they were placed.

Please see the note accompanying this service pack for full details of
the new feature.

Please note, the menu file has been updated to add a new option to the
Order Enquiries and Reports Menu (Order Completion Statistics).

Please copy SO-Menus from your program unit ($P) to your data unit
(STD) after applying this Service Pack. This step is not required if
service pack ZM60_000080_000 has been applied and unit 'G3M' has been
assigned to your program unit ($P).

Please also note, the DBAUTHP database has been revised to include an
entry for new frame SO245.

```
ZM60_000191_000        CL and DL Transaction Line Entry Profile.
```

CL/DL Transaction Entry [GX18222IDC]
─────────────────────────────────────

A new button labelled Set-up has been added to the Creditors Batches
and Debtors Batches windows.

Pressing the Set-up button provides access to a new window that
allows operator specific configuration options for transaction line
entry to be saved as a user profile.

The options allow various transaction line fields to be either skipped
(during the creation of new transactions) and/or hi-lighted. When a
field is skipped it is set to the default value generated by
transaction entry, the operator can go back and amend skipped fields
if required.

Please see the accompanying service pack for further details.

ZM60_000193_000   DL Outstanding Credit Claims List.

DL Outstanding Credit Claims List [GX18230IDC]
───

This service pack introduces a new Debtors Ledger report which lists
outstanding credit claims.

A new report (available from the Debtors Ledger Reports and Statistics
menu) named Outstanding Credit Claims List has been created which
prints the following details for outstanding credit claims. The report
criteria include options to print claims for a single or all
companies, a single, range or all customers. The claims can be further
limited to those entered between two user specified dates and to

claims under investigation, claims where the investigation is complete
or both.

Please see the accompanying service pack note for further details.

Please note, the Debtors Ledger menu file has been updated to add a
new option to the Reports and Statistics Menu (Outstanding Credit
Claims List).

Please copy DL-Menus from your program unit ($P) to your data unit
(DLD) after applying this Service Pack. This step is not required if
service pack ZM60_000080_000 has been applied and unit 'G3M' has been
assigned to your program unit ($P).

Please also note, this service pack includes an update to the DBAUTHP
database to include a new authorisation points for DL385 - Outstanding
Credit Claims.

ZM60_000198_000   SOP Customer Facing Documents

SOP Customer Facing Documents [gx18247]
_____

This service pack introduces new functionality within Sales Order
Processing. The new functionality allows Quotations, Acknowledgements
and Delivery Notes to be printed in PDF format or to be delivered to
customers via email. New system and customer settings have been
created to allow the delivery of quotations, acknowledgements and
delivery notes via email to be configured.

For customers configured to receive documents via email,
quotation/acknowledgement/delivery note print automatically generates
an email for each document containing the quotation, acknowledgement
or delivery note as a pdf format attachment file and sends it.
Provisions have been made within quotation, acknowledgement and
delivery note print to generate a printed copy of an emailed document
via a runtime option.

When a document is delivered via email, up to five additional
attachment files can be sent, these can be defined in system
parameters.

In addition this service pack provides the ability to produce invoices
and credit notes in PDF format. Printing quotations,
acknowledgements, delivery notes, invoices and credit notes in PDF
format can be selected via the Print Options window at runtime.

Please see the note accompanying this service pack for full details of
the new feature.

Please note, Delivery of documents via email and printing documents in
PDF format requires an up-to-date copy of either PDF_In-The-Box or
All_In_The_Box to be present on each GX client used to perform the
document generation.

Tax Rates [gx18044]
_____

This service pack changes the way in which tax rates are handled
throughout the Global 3000 applications. It introduces a start date
and expiry date for each rate percentage per tax code.

Please see the note accompanying this service pack for full details.

Please note, prior to these changes each tax code held a single
percentage rate, after applying this service pack the system will
automatically translate these to a single tax rate valid for all
dates.

ZM60_000207_000   PDF Format/Email Delivery of Purchase Orders

Purchase Order Print [gx18287IDC]
_____

This service pack introduces a new feature in Purchase Order
Processing. The new feature allows purchase orders to be printed in
PDF format and optionally to be delivered via email. New system and
supplier settings have been created to allow the delivery of purchase
orders via email to be configured.

Printing purchase orders in PDF format can now be selected via the
Print Options window at runtime.

For suppliers configured to receive purchase orders via email,
purchase order print automatically generates an email containing the
order as a pdf format attachment file and sends it. This is done
whenever a purchase order is selected for printing.
Provisions have been made within purchase order print to generate a
printed copy of an emailed order.

When an order is delivered via email, up to five additional attachment
files can be sent, these can be defined in system parameters.

In addition the dialogue within purchase order print has been
improved, the main changes are that purchase order print is now
controlled via a single main window and that orders selected for
printing are listed on screen at all times.

Please see the note accompanying this service pack for full details of
the new feature.

Please note, printing purchase orders in PDF format/the delivery of
purchase orders via email requires an up-to-date copy of either
PDF_In-The-Box or All_In_The_Box to be present on each GX client used
to perform the order generation.

ZM60_000216_000   Update to Manufacturer Works Order Completion.

Works Order Completion [gx18299]
──

This service pack introduces a new option to Works Order Completion.

A new option labelled Allow write-offs during completion has been
added to the Manufacturer - Completion system parameters along with an
optional password to protect the new feature. If the "Allow write-offs
during order completion" option is enabled and all components have
been issued to the order, you may enter zero as the completed quantity
within Works Order Completion to reduce the remaining quantity of the
works order to zero and write-off any unused components.

In addition new options to record a Write-off profit centre and
account have been added to the Manufacturer - GL Integration system

parameters.   If the remaining quantity of a works order is written off
during completion and costs are posted to General Ledger, the cost
value of all unused components is posted to General Ledger as follows:

CR Work in progress account.
DR Write-off account.

Please see the accompanying service pack note for further details.

Please also note, this service pack includes the latest versions of
reporter copy libraries S.PRINT and S.PRINT2.

ZM60_000219_000   SOP Credit Checking and Quotations.

SOP Credit Checking and Quotations [gx18318]
──

This service pack introduces new options for SOP Quotations.

Two new options have been added to SOP Parameters\Quotations.

The first new option is titled Exclude quotations from the
outstanding orders total? . When this is set the values for quotations
are not included in the outstanding/uninvoiced orders totals shown in
enquiries and are not included when the value of outstanding orders is

used for credit checking.

The second new option is titled Automatically purge expired
quotations? . When this is set an expiry date can be specified as each
quotation is entered. The system automatically purges any quotations
that have not been converted to orders but have passed their expiry
date. The expiry date defaults to the system date plus the number of
day s quotations are retained.

In addition the Account Details window within the SOP Transaction
Desktop has been updated to include a new button labelled Previous
Orders which provides a S.O.P. transactions enquiry for the currently
selected customer.

Please note, quotations entered prior to switching on the
'Automatically purge expired quotations' parameter will NOT have an
expiry date, if you wish for these to be automatically purged you must
amend the quotation header details and manually enter an expiry date.

Please see the accompanying service pack note for further details.

Budgets and Forecasts [gx18335]
_____

This service pack introduces two new options within General Ledger
Budgets and Forecasts - Copy actuals to Forecasts.

The first new option is titled Restrict to company and is used to
restrict the copy of actuals to forecasts to a single company.

The second new option is titled Copy actuals for all accounts and
only applies to account groups defined as holding budgets and
forecasts at individual account level. When set actuals are copied to
all accounts regardless of whether or not a budget or forecast has
already been defined. When not set actuals are only copied for
accounts that already have a budget or forecast.

Please see the accompanying service pack note for further details.

Stocktake Report [gx18356]
─────────────────────────────

This service pack introduces a new option for the Stocktake Report.

A new system parameter has been added to Stock Parameters\Stocktake.
The new parameter is titled Print recorded quantity and value on
stocktake report? . If this is not set the recorded quantity and
recorded value columns are not printed on the stocktake report.

Please see the accompanying service pack note for further details.

ZM60_000228_000   Update to SOP Invoice/Credit Note Print.

Invoice/Credit Note Print [D18359]
───────────────────────────────────

The reporter extract file created by invoice/credit note print has
been updated so that the tax rate is now passed for each line. The
line tax rate is now passed in new field XNTXRT and is the tax rate in
force for the invoice/credit note date.

This new field is not used by the standard invoice/credit note print
and has been included solely for use by resellers wishing to produce
tailored versions of these documents.

Please note, this service pack includes the latest version of reporter
copy library S.PRINT (which includes the new field).

ZM60_000229_000   Update to Cash Manager Bank Reconciliation.

Cash Manager Bank Reconciliation [gx18352]
_____

Cash Manager Bank Reconciliation has been updated to include the
following two new buttons:

 Import Statement - This allows statement details to be imported from
a csv format file/spreadsheet. When pressed the user is prompted for
the import file details and structure (the import details are retained
and used as defaults the next time the option is selected), the file
is then imported into memory and its transactions are listed in the
new Imported Statement Details window.

 Imported Transactions - If previously imported transactions have
been saved (by exiting the Imported Statement Details window) they
are listed for further processing.

A new window titled Imported Statement Detail has been added to
process the imported transactions. It has the following buttons:

Automatically Match Transactions - This compares the imported
transaction details (that have not already been matched) with the
unpresented items for the cash book, if a match is found then the
unpresented item is added to the current statement and the imported
transaction is marked as having been matched.

Manually Match - This selects the currently high-lighted imported
transaction and displays the list of unpresented items for the cash
book, if one is selected it is added to the current statement and the
imported transaction is marked as having been matched.

Add as Statement Direct - This selects the currently high-lighted
imported transaction and adds it to the current statement as a
statement direct transaction. The imported transaction is then marked
as having been matched.

Include/Exclude Matched Items - This switches between including and
excluding matched items in the list of imported transactions.

Remove Match - This will mark the currently high-lighted imported
transaction as not matched and return the Cash Manager transaction it
was matched with to the unpresented items for the cash book.

View Match Details - This will list the Cash Manager transaction(s)
matched with the current item.

Delete Item - This will delete the current imported transaction.

Delete by Reference - This will delete the current imported
transaction and any other (un-matched) imported transactions that have
the same reference.

Abandon - This will abandon all remaining un-matched transactions. In
this case the imported transactions are not saved.

Save and Exit - The Imported Statement Details window is closed, if
there are any un-matched items the imported transactions are saved and
are then recalled the next time the reconciliation is entered or if
the Imported Transactions button is pressed.

Please see the accompanying service pack note for further details.

ZM60_000230_000   Update to Creditors Ledger Auto-Payments.

Creditors Ledger Auto-Payments [gx18006]
_____

This service pack introduces new functionality within Creditors Ledger

Auto-Payments. The new functionality allows remittance advices to be
printed in PDF format or to be delivered to suppliers via email. New
system and supplier settings have been created to allow the delivery
of remittance advices via email to be configured.

For suppliers configured to receive documents via email, remittance
advice print automatically generates an email for each document
containing the remittance advice as a pdf format attachment file and
sends it. Provisions have been made within auto-payments to generate a
printed copy of an emailed remittance advice via a runtime option.

When a document is delivered via email, up to five additional
attachment files can be sent, these can be defined in system
parameters.

Please note, combined cheques and remittance advices cannot be printed
in PDF format or delivered via email.

Please see the note accompanying this service pack for full details of
the new feature.

Please note, Delivery of documents via email and printing documents in
PDF format requires an up-to-date copy of either PDF_In-The-Box or
All_In_The_Box to be present on each GX client used to perform the
document generation.

ZM60_000231_000   SOP - Copy product long descriptions.

SOP - Copy Product Long Descriptions [gx18375]
_____

This service pack renames the Copy long descriptions at order entry
system parameter as Copy product long descriptions to transaction
line comments . The newly named parameter has the following three
possible settings.

 When transaction lines are initially entered
 When the transaction line comments option is selected
 Never

Please note, after applying this service pack you must check that the
newly named parameter is set correctly for your operational
requirements.

Please see the accompanying service pack note for further details.

Post Application Text

Please note, after applying this service pack you must check that the
newly named parameter is set correctly for your operational
requirements.

After applying this service pack the newly renamed parameter will be
set as follows:

If the old parameter was set, the newly named parameter will be set to
'When transaction lines are initially entered'.

If the old parameter was not set, the newly named parameter will be
set to 'When the transaction line comments option is selected'.

ZM60_000233_000   Update to Manufacturer - Works Order Entry.

Works Order Entry [GX17674]
_____

Works Order Entry has been updated to allow the quantity to be
manufactured to be changed when amending an existing works order.

Any attempt to reduce or increase the quantity of finished items being
manufactured refers back to the current assembly bill for the product.
If any components in the current assembly bill do not appear on the
works order, the quantity to be manufactured cannot be amended.

When the quantity is changed the system works out the number of each
component required using the current assembly bill and moves this to
the first line on the works order for that component.

It should be noted that if the quantity is changed any manual changes
to component quantities are not retained.

The quantities of works orders created for sub-assemblies are also
updated to reflect the quantity amendment.

The quantity to be manufactured cannot be reduced below the quantity
that has already been completed.

Issued stock (not used to complete finished products) must be returned
before the quantity to be manufactured is reduced, this restriction is
not relevant when the quantity to be manufactured is increased.

Please see the accompanying service pack note for further details.

ZM60_000234_000          Problems with Field DBSTOCK:OHBFIX
```

SOP Order Header Record [gx18384]
─────────────────────────────────────

This service pack resolves a technical problem with the SOP Order
Header Record.

The problem is with the recently released changes that introduced an
expiry date for quotations. This date was included in the database by
redefining the tailoring area on the SOP Order Header record
(DBSTOCK:OH) with an 8 character date field (dd/mm/yy). Unfortunately
this field has been found to exceed the available space in the
tailoring area and as such the last character overlaps the tailoring
area reserved for reseller use.This has now been resolved by replacing
the 8 character date field with a 6 character ISO-8601 format date
(yymmdd).

Note for resellers
──────────────────

This service pack will automatically convert the data to replace the 8
character dates with the ISO-8601 format dates on existing records
(via a data conversion routine executed during start-up). It should be
noted that it is possible that existing order header records with a
quotation expiry date may have corrupted the first byte of field
DBSTOCK:OHTAIL and as such any tailored code using this may require
revision.

ZM60_000241_000   Company Email Addresses.

Company Email Addresses [gx18415]
_____

This service pack introduces new functionality when documents are
generated in PDF format (for either printing or delivery via email).
The new functionality allows alternate email addresses to be used when
the company name and address is included on the following documents:

        Creditors Ledger remittance advices.
        Debtors Ledger customer statements.
        SOP customer facing documents.
        POP orders.

The alternate email addresses for the above documents are accessed via
a new button labelled Email Addresses which has been added to the
company details window within system parameters. If any of the above
alternate email addresses are left blank the company email address
shown on the company details window is used.

Please see the note accompanying this service pack for full details of
the new feature.

Company Name and Address on SOP Customer Facing Documents [gx18380]
──
───────────────

This service pack introduces new system settings for Sales Order
Processing. The system settings provide control over whether or not
the company name and address is included when Invoices (including
pro-forma invoices), Credit Notes, Quotations, Acknowledgements and
Delivery Notes are printed (in both standard and PDF format) or
delivered to customers via email.

The new settings are labelled

Include company name and address on invoices?
Include company name and address on credit notes?
Include company name and address on quotations?
Include company name and address on acknowledgements?
Include company name and address on delivery notes?

Please see the note accompanying this service pack for full details of
the new feature.

ZM60_000253_000   Archive Inactive A/c - Fixes + Reseller Intercept

Archive Inactive Accounts [gx18468]
───

Before a customer/supplier account has its status changed to inactive
the system is not checking that there are no outstanding

sales/purchase orders for the account.   In addition a new prompt has
been added to control whether or not accounts with outstanding SOP
quotations are included when archiving customer accounts.

End of Period [gx18468]
─────────────────────────────────

A new prompt labelled Archive date has been added to allow the
archive date to be specified when the Archive inactive accounts
option is selected. When this option is selected all accounts are
checked to see if they have had any payment or invoicing activity
since the archive date, if they have not and they have no outstanding
sales/purchase orders then their status is changed to inactive .

Account Status Intercepts [gx18468]
─────────────────────────────────────

This service pack introduces a new intercept points which allow
resellers to include additional processing within Debtors Ledger and
Creditors Ledger. An intercept point has been provided immediately
before an account has its status changed from active to inactive.

Please see the accompanying service pack note for further details.

_____

Global 3000 Manufacturer operates on the basis that the component
quantity specified in the assembly bill includes any wastage that may
occur during the manufacturing process. This service pack introduces a
new setting within Product Maintenance - Assembly Bills to allow user
to specify the percentage of the component quantity that is wastage.

This percentage is then shown on enquiries and reports.

Please see the accompanying service pack note for further details.

Manufacturer - Trial Kitting [D18250]
_____

The trial kitting enquiry and report have been updated to show the
estimated cost of components (if the system setting to display costs
in order entry is set).

Please see the accompanying service pack note for further details.

ZM60_000259_000   New Extension Database

Extension Database [gx18449]
───

This service pack introduces an extra extension database. The
extension database (DBEXTN) will be used to further develop the
applications and resolve problems that would otherwise require a new
generation of the data dictionaries.

The extension database is enabled via a new system parameter (within
Administration Parameters - Operating Options). When the extension
database is initially enabled an empty database is created (in the
same location and format as the PARAS database) and if Stock Control
is in use some initial data set-up is performed. Please note this may
take a short while.

The extension database is a DBX format database and as such is not
available at sites where data is held in either Native or C-ISAM
format.

Currently the extension database is only supported at sites holding
data in Pervasive SQL format.
A version to support Microsoft SQL databases is currently planned.

Please see the accompanying service pack note for further details.

Product Maintenance [D18448]
───

In some cases when creating a new product there is a delay between
entering the new product code and the prompt for the template product
appearing.

Please note: This problem is only resolved at sites where the
extension database (see above) is enabled.

ZM60_000262_000   Debtors Ledger Held Transactions.

DL - Held Transactions [gx18513]
──

This service pack provides the ability to hold transactions (invoices
and credit notes), the changes are as follows.

A new function (named Hold/Release Transactions) has been created to
provide the ability to hold and release transactions.

Enquiries have been extended to include an indicator for held
transactions.

The aged debt report (detailed) has been updated to include an
indicator when a transaction is currently held.

SOP credit checking has been updated to exclude held transactions.

Please see the accompanying service pack note for further details.

ZM60_000263_000   Transaction Notes in Debtors and Creditors Ledger.

Transaction Level Notes (Debtors Ledger and Creditors Ledger)
[gx18514]
_____
_____

This service pack introduces the ability to enter transaction level
notes in Debtors Ledger and Creditors Ledger.

Please note, the following features are only available at sites
configured to use the extension database (see service pack
ZM60_000259_000 for details).

Transaction entry has been extended to include a new button labelled
'Item Notes', when pressed transaction notes can be viewed and
updated. It has also been updated to include an indicator (Item
Notes) to show when a transaction has notes.

Transaction enquiries have been extended to include a new button
labelled 'Item Notes', when pressed transaction notes can be viewed
and updated. It has also been updated to include an indicator (Item
Notes) to show when a transaction has notes.

Creditors Ledger Auto-Payments has been extended to include a new
button labelled 'Notes', when pressed transaction notes can be viewed
and updated. It has also been updated to include an indicator

(Notes) to show when a transaction has notes.

The Release Held Items function in Creditors Ledger has been renamed
 Hold/Release Transactions .

The Hold/Release Transactions function has been updated to include a
new button labelled 'Notes', when pressed transaction notes can be
viewed and updated. It has also been updated to include an indicator
(Notes) to show when a transaction has notes. In addition, when a
transaction is held or released a transaction note is automatically
generated indicating the change in transaction status along with the
operator id and date.

Please see the accompanying service pack note for further details.

ZM60_000266_000   Update to Creditors Ledger Logged Invoices.

Transaction Level Notes - Creditors Ledger Logged Invoices [gx18534]
_____
_____

This service pack introduces the ability to enter transaction level
notes whilst approving logged invoices.

Please note, the following features are only available at sites
configured to use the extension database (see service pack
ZM60_000259_000 for details).

The logged invoice approval process within Creditors Ledger has been
extended to include a new button labelled "Item Notes", when pressed
transaction notes can be viewed and updated. It has also been updated
to include an indicator (Item Notes) to show when a logged invoice
has notes. When a logged invoice is approved its transaction level
notes are copied to the approved invoice and can then be updated
independently of those recorded against the original logged invoice.

The logged invoice enquiry (within Creditors Ledger) has been extended
to include a new button labelled "Notes", when pressed transaction
notes can be viewed and updated. It has also been updated to include
an indicator (Notes) to show when a transaction has notes.

Please see the accompanying service pack note for further details.

ZM60_000272_000        Real Time Posting to GL and CM   ** READ WARNING **

General Ledger/Cash Manager Posting [gx18531]
─────────────────────────────────────────────────────
```

WARNING: THIS SERVICE PACK MUST NOT BE APPLIED IF THERE ARE CURRENTLY
ANY DEBTORS LEDGER, CREDITORS LEDGER OR CASH MANAGER BATCHES WITH A
STATUS OF EITHER '*POST' OR 'BAD'. IF ON-LINE POSTING IS NOT IN USE
ALL GL ANALYSIS MUST BE TRANSFERRED BEFORE THIS SERVICE PACK IS
APPLIED. FAILURE TO DO SO WILL RESULT IN DATA CORRUPTION.

Debtors Ledger (DL), Creditors Ledger (CL) and Cash Manager (CM) have
all been updated to change the way they make postings to General
Ledger (GL), in addition the way in which DL and CL post to CM has
also been updated.
The use of intermediate posting files (and the option to use on-line
posting) between these modules has been removed and they now make
postings directly in to GL (and CM in the case of DL and CL) as each
batch is posted.

Please note, after applying this service pack DL and CL must have
access to the CM database (if CM is in use) and DL, CL and CM must
have access to the GL database (if GL is in use).

The option to export DL and CL batches via the export driver (at time
of posting) has been removed.

The option to post summary transactions (including summarised control
postings) from DL, CL and CM to GL has been removed; if consolidation
of these postings is required it can be achieved via the GL account
setting 'Consolidate postings at auto-entry'.

The 'Print GL Transfer File' and 'Create GL Transfer File' functions

have been removed from DL, CL and CM.
A new button labelled 'View Journal' has been added to the GL analysis
windows in DL, CL and CM enquiries. When pressed the GL journal
transaction generated when the analysis line was posted is displayed.
It is only available for transactions posted after this service pack
is applied.

Set up Required

After this service pack is applied you must select General Ledger
Interface Definitions and set the new sub-module option for all
interfaces that relate to Global 3000 Debtors Ledger, Global 3000
Creditors Ledger or Global 3000 Cash Manager. Once this is complete
you must then select Cash Manager Interface Definitions and ensure
that the posting type option is set correctly for all interfaces that
relate to Global 3000 Debtors Ledger and Global 3000 Creditors Ledger.

Posting to General Ledger

When a transaction is posted in a sub-module (DL, CL or CM) any
General Ledger analysis associated with it is automatically posted to
the General Ledger, when this takes place the following rules (in
conjunction with the settings specified for the sub-module within
interface definition maintenance) are applied.

If the interface definition for the sub-module specifies that the
General Ledger batches are to be posted, a new batch (within General
Ledger) is created to hold the analysis and is then closed on
completion of the posting.

If the interface definition for the sub-module specifies that the
General Ledger batches are to be left open, the analysis is added to
the first open batch (within General Ledger) for the
sub-module/current system date. If there is no open batch for the
sub-module/current system date a new batch is created. This ensures
that postings for each sub-module are grouped based on the day they
were posted. If this method is used incoming transactions (for
accounts configured to consolidate postings at auto-entry) are
consolidated with transactions that already exist in the batch.

If the interface definition for the sub-module specifies that postings
are to be consolidated across transfers, the analysis is added to the
first open batch (within General Ledger) for the sub-module. If there
is no open batch for the sub-module a new batch is created. Open
General Ledger batches for the sub-module can be closed manually at
any point which provides greater control over how the postings are
grouped. If this method is used incoming transactions (for accounts
configured to consolidate postings at auto-entry) are consolidated
with transactions that already exist in the batch.

Posting to Cash Manager

When a payment type transaction is posted in Debtors Ledger or
Creditors Ledger (including payments made via Creditors Ledger
auto-payments) it is automatically posted to Cash Manager. Each batch

posted in Debtors Ledger and Creditors Ledger is posted to a new batch
in Cash Manager using the settings and consolidation rules specified
for the module within Cash Manager interface definitions and Debtors
Ledger/Creditors Ledger system parameters (operating options section).
Please note the option to print a transfer report when postings are
made to Cash Manager from Debtors Ledger or Creditors Ledger has been
removed.

Please note, the menu files for Debtors Ledger, Creditors Ledger and
Cash Manager have been updated to remove the 'Print GL Analysis
Report' and 'Create GL Transfer File' options from the End of Period
Processing Menu .

Please copy DL-Menus, CL-Menus and CM-Menus from your program unit
($P) to your data units (DLD, CLD and CMD) after applying this Service
Pack. This step is not required if service pack ZM60_000080_000 has
been applied and unit 'G3M' has been assigned to your program unit
($P).

Please see the accompanying service pack note for further details.

Post Application Text

After this service pack is applied you must select General Ledger
Interface Definitions and set the new sub-module option for all
interfaces that relate to Global 3000 Debtors Ledger, Global 3000
Creditors Ledger or Global 3000 Cash Manager. Once this is complete
you must then select Cash Manager Interface Definitions and ensure
that the posting type option is set correctly for all interfaces that
relate to Global 3000 Debtors Ledger and Global 3000 Creditors Ledger.

ZM60_000274_000   General Ledger Postings Reports

General Ledger Posting Report [gx18571]
_____

This service pack provides a new report named General Ledger Postings
Report . This is similar to the GL Analysis Report which was made
redundant by the recently released real-time posting changes. The new
report is available in Debtors Ledger, Creditors Ledger and Cash
Manager.

It is available as a stand-alone option on the End of Period Menu.
When selected, it prints a report listing all GL Analysis generated by
the module (in GL company, profit centre and account sequence) for the
current period.

The report can be printed in either standard or PDF format depending
on the selection in the report options window. If printed in PDF
format it includes the General Ledger transaction number generated
when the analysis was posted.

Please note, printing reports in PDF format requires an up-to-date
copy of either PDF_In_The_Box.dll or All_In_The_Box.dll to be present
on each GX client used to perform the document generation.

Please note, the menu files for Debtors Ledger, Creditors Ledger and
Cash Manager have been updated to include the 'General Ledger Postings
Report' option in the End of Period Processing Menu .

Please copy DL-Menus/CL-Menus/CM-Menus from your program unit ($P) to
your data unit (DLD/ CLD/CMD) after applying this Service Pack. This
step is not required if service pack ZM60_000080_000 has been applied
and unit 'G3M' has been assigned to your program unit ($P).

Please see the service pack notes accompanying the Debtors Ledger,
Creditors Ledger and Cash Manager service packs.

ZM60_000275_000   Printing Transaction Notes in DL and CL.

Transaction Level Notes [GX18578]
───────────────────────────────────────

This service pack introduces the ability to print transaction level
notes.

Please note, the following features are only available at sites
configured to use the extension database (see service pack
ZM60_000259_000 for details).

This service pack updates the customer/supplier account print within
enquiries, the aged debt/credit report (detailed mode only) and the
transaction history report (detailed report only) to provide a new run
time option. The new option (labelled Include transaction notes?)
allows transaction level notes to be printed on the reports.

In addition transaction entry has been updated to allow transaction
level notes to be viewed and updated when enquiring upon posted
batches.

Please see the accompanying service pack note for further details.

SOP Emailed Invoices/Credit Notes - Revisions [gx18597]
───

This service pack introduces a new system setting within System
Maintenance, SOP, Invoice Options - PDF/Email. The new setting allows
a limit to be specified for the number of invoices and credit notes
that can be collated into a single email.

In addition a new customer setting has been added that allows a Cc
email address to be specified for invoices and credit notes delivered
via email.

Please see the note accompanying this service pack for full details of
the new feature.

Please note, emailing documents in PDF format requires an up-to-date
copy of either PDF In-The-Box or All_In_The_Box to be present on each
GX client used to perform the document generation.

ZM60_000292_000   Update to Exchange Gain/Loss Handling.

Exchange Gain/Loss During Transaction Allocation [gx18583]
──
This service pack introduces a change to the way in which exchange
gain/loss realised, during transaction allocation, is processed. Once
this service pack is applied exchange gain/loss generated during
transaction allocation is automatically transferred from the
allocation records to journal transactions during post batch.

The company totals enquiry windows and report will continue to show
the exchange gain/loss as a separate figure however, they have been
updated to reflect the fact that the figures for exchange gains and
losses are included in the totals for journal debits and credits.

Please note, journal creation for exchange gains and losses does not
take place until after the period in which these changes are applied
has been closed.

Please see the notes accompanying the Debtors Ledger and Creditors
Ledger service packs for further details.

Creditors Ledger - Collation of PDF Format Remittance Advices
[gx18637]

_____

This service pack introduces a new system setting within System
Maintenance, Creditors Ledger, Auto-Payments, Remittance Options -
PDF/Email. The new setting allows PDF format remittance advices to be
collated into a single file when printing.

Please see the note accompanying this service pack for full details of
the new feature.

Please note, the generation of documents in PDF format requires an
up-to-date copy of either PDF_In_The_Box or All_In_The_Box to be
present on each GX client used to perform the document generation.

ZM60_000296_000   New POP Report

POP Overdue Items Report [gx14494]
_____

This service pack introduces a new report named Overdue Items Report
which is available from the Order Reporting Menu within Purchase Order
Processing.

The new report is only available in PDF format and shows details of
order lines which are overdue based on their due date.

Please see the note accompanying this service pack for full details of
the new feature.

Please note, Delivery of documents via email and printing documents in
PDF format requires an up-to-date copy of either PDF_In-The-Box or
All_In_The_Box to be present on each GX client used to perform the
document generation.

Please copy PO-Menus from your program unit ($P) to your data unit
(STD) after applying this Service Pack. This step is not required if
service pack ZM60_000080_000 has been applied and unit 'G3M' has been
assigned to your program unit ($P).

Product Maintenance [gx18643]
─────────────────────────────

This service pack allows non-serialised products to be changed to
serialised.

The following limitations apply:

There must be no current stock for the product at any location.

The product must not be included in a current stock take.

If Global 3000 Purchase Order Processing is in use there must be no
part received purchase order lines for the product.

If Global 3000 Sales Order Processing is in use there must be no
allocated or picked order lines for the product.

If Global 3000 Manufacturer is in use there must be no stock allocated
or issued to works order lines. There must be no part complete works
orders where the product is the product being manufactured.

Please note, it is not possible to change a serialised product to a
non-serialised product once transactions have been entered.

Please see the note accompanying this service pack for further
details.

Credit Checking in SOP - Branch Accounts [gx18671]
───

This service pack updates system parameters to include a new option in
the SOP Parameters, Order Entry - Credit Checking Window.

The new option is named Details to use for branch accounts . It has
the following settings, Branch level , Head Office level and
 Branch and Head Office level .

Sales Order Entry, the Transaction Desktop and Automatic Allocation
have been updated to use the new parameter when credit checks are
performed for branch accounts.

In addition the Account Details window within the SOP Transaction
Desktop has been updated to include a new button labelled Branch
Details (only available for branch and head office accounts) which
provides a list of branches and their transaction totals for the head
office account applicable to the current transaction.

Please see the accompanying service pack note for further details.

User Profiles [gx18704]
─────────────────────────
This service pack introduces a new option to the Administration System
Parameters. The new option (labelled Profile Administrator Options)
allows you to configure options that govern the operator specific
configuration settings (known as profiles) within Debtors Ledger
Transaction Entry, Creditors Ledger Transaction Entry and the SOP
Transaction Desktop.

It also allows you to define a default profile for use when an
operator does not have a specific profile for Debtors Ledger
Transaction Entry, Creditors Ledger Transaction Entry and the SOP
Transaction Desktop.

Please note, part of these changes involves the removal of the ability
to define company specific SOP Transaction Desktop profiles.

Please see the accompanying service pack note for further details.

ZM60_000312_000   Update to Cash Manager Posting.

Cash Manager Posting [gx18621]
─────────────────────────────────────

WARNING: You must ensure that all DL and CL payment, refund, void
cheque and dishonoured cheque batches are posted before applying this
service pack.

This service pack updates the posting of Debtors Ledger and Creditors
Ledger batches to Cash Manager as follows:

Debtors Ledger now posts customer refund and cancelled receipt
(dishonoured cheque) batches to Cash Manager as payments rather than
as negative receipts.

Creditors Ledger now posts supplier refund batches to Cash Manager as
receipts rather than as negative payments.

The Analysis code for sending system payments when transaction type
has no default specified in Cash Manager interface definition
maintenance is no longer used for Debtors Ledger and Creditors Ledger.

The Interface Transaction Codes window (within Cash Manager system
parameters/Transaction Codes) has been renamed as Transaction Codes
Used During Posting , the transaction codes within this window are now
validated to be the correct type as are the analysis codes which are
now mandatory.

Debtors Ledger and Creditors Ledger transaction entry has been updated
to include a new prompt named Bank Ref (available for payment,
receipt, refund. cancelled payment (void cheque) or cancelled receipt

(dishonoured cheque) batches) this is used to control the
consolidation of transactions posted to Cash Manager. When a payment,
receipt or refund batch is posted, all items for which the new Bank
Ref prompt has the same value (and not blank) are consolidated (and
dated as per the latest dated transaction contributing to the
consolidated transaction). The options for manual consolidation
(within DL and CL transaction entry) have been removed.

The consolidation options specified in Cash Manager interface
definition maintenance are no longer used for Debtors Ledger and
Creditors Ledger.

In addition a number of on screen references to dissection codes
have been replaced with analysis codes .

Set up Required
────────────────

After this service pack is applied you must enter the newly renamed
 Transaction Codes Used During Posting window (Cash Manager System
Parameters/Transaction Codes) and ensure that the transaction and
analysis codes used for postings from Debtors Ledger and Creditors
Ledger are correct.

Please see the accompanying service pack note for further details.

Post Application Text

WARNING: You must ensure that all DL and CL payment, refund, void
cheque and dishonoured cheque batches are posted before applying this
service pack.

Please Note: After applying the service packs you must enter the Cash
Manager Transaction Codes Used During Posting window (accessed by
pressing the Next> button within Cash Manager system parameters,
Transaction Codes window) and ensure that all transaction codes and
analysis codes are correct.

ZM60_000315_000   Update to DL and CL Batch Types.

DL and CL Batch Types [gx18707]
───────────────────────────────────────

This service pack introduces changes that rename the following Debtors
Ledger and Creditors Ledger batch types:

Debtors Ledger Payment batches are now referred to as Receipt
batches.

Debtors Ledger Dishonoured Cheque batches are now referred to as
 Cancelled Receipt batches which in some cases may be abbreviated to
 Canc Rec , Cancel Recpt or Cancel Receipt .

Creditors Ledger Void Cheque batches are now referred to as
 Cancelled Payment batches which in some cases may be abbreviated to
 Canc Pay , Cancel Paymt or Cancel Payment .

Please note, these changes only apply to onscreen and printed
displays, the underlying data remains unchanged.

ZM60_000316_000   New 'Where Used' Report.

Where Used Report [gx18426]
_____

This service pack introduces a new function named Where Used Report
which is available from the Product Maintenance Menu within Sales
Order Processing, Stock Control, Purchase Order Processing and
Manufacturer.

The new report is only available in PDF format and shows details of
which product s accessory lists and assembly bills a product appears
in. Products included in the report can be selected by location,
product group and/or product range.

Please see the note accompanying this service pack for full details of
the new feature.

Please note, Delivery of documents via email and printing documents in
PDF format requires an up-to-date copy of either PDF_In_The_Box or
All_In_The_Box to be present on each GX client used to perform the
document generation.

Please copy SO-Menus, PO-Menus, MG-Menus and ST-Menus from your
program unit ($P) to your data unit (STD or MGD) after applying this
Service Pack. This step is not required if service pack
ZM60_000080_000 has been applied and unit 'G3M' has been assigned to
your program unit ($P).

ZM60_000317_000   Update to Currency Confirmation (DL, CL and CM).

DL/CL/CM Currency Confirmation [gx18708]
───

This service pack updates the following:

The standard currency information window so that when it is displayed
the amount is prompted for before the exchange rate.

Debtors Ledger and Creditors Ledger transaction entry so that when
entering a receipt (DL) or a payment (CL) where the entry currency
differs from the cash book currency (and Cash Manager is in use), the
amount in cash book currency and exchange rate details are
automatically shown (via the currency information window) and can be
amended to match the values supplied by the bank. On exit from the
currency information window the exchange rate is assumed to be
confirmed (but can be marked as unconfirmed and confirmed later via
Cash Manager if required) if the exchange rate and amount in cash book
currency have been changed.

When entering foreign currency receipts or payments in Cash Manager
(including statement direct transactions) the currency information
window is automatically be entered. On exit from the window if the
value in cash book currency has been changed the exchange rate is
marked as confirmed (but can be unconfirmed if required).

Please see the accompanying service pack note for further details.

ZM60_000320_000   Settlement discount taken on tax.

Debtors Ledger/Creditors Ledger   Analyse Settlement Discount to Tax
[gx14768]
_____
_____

This service pack extends the General Ledger analysis of settlement
discount taken to analyse the proportion of the settlement discount
taken against tax to a separate General Ledger profit centre and
account. It renames the UK Tax processing parameter as Calculate
VAT net of settlement discount (as per UK HMRC legislation) . It
introduces four new system settings within Administration Parameters
Tax Codes (accessed via a new button labelled Discount Analysis).

The first is labelled Calculate settlement discount on gross invoice
values). It configures Debtors Ledger and Creditors Ledger to
calculate settlement discount on the gross value of invoices (if the

calculation of VAT net of settlement discount (as per UK HMRC legislation) is not in use).

The second is labelled Analyse settlement discount taken to net and tax . This new setting configures Debtors Ledger and Creditors Ledger so that the portion of settlement discount (taken with a payment/receipt) that is allocated against the tax portion of an invoice is analysed to a separate General Ledger profit centre and account when the payment/receipt is posted.

If settlement discount is analysed to net and tax a third new setting is available. This is labelled Analyse Debtors Ledger settlement discount on tax to output tax control accounts . When set Debtors Ledger settlement discount on tax is analysed to the relevant output tax control accounts. When not set Debtors Ledger settlement discount on tax is analysed to a profit centre and account specified on the cash book control account relating to the receipt being posted.

If settlement discount is analysed to net and tax a forth new setting is available. This is labelled Analyse Creditors Ledger settlement discount on tax to input tax control accounts . When set Creditors Ledger settlement discount on tax is analysed to the relevant input tax control accounts. When not set Creditors Ledger settlement discount on tax is analysed to a profit centre and account specified on the cash book control account relating to the payment being posted.

Many countries operate a "tax at invoice" policy requiring traders to adjust tax to account for settlement discount taken on receipts. Global 3000 Debtors Ledger and Creditors Ledger have been extended to provide this facility through the "Analyse settlement discount taken to net and tax" option in system parameters that is available at sites configured to use the option to calculate settlement discount on gross invoice values.

The separate General Ledger profit centre and account to which settlement discount taken on sales tax is analysed are prompted for in the cash book control account codes window. They are available when the "Analyse settlement discount taken to net and tax" option is set in systems administration is not set.

Note: Debtors Ledger receipts and Creditors Ledger payments are only subject to the new processing if they are allocated prior to posting, items allocated via allocation type batches are not subject to the new processing.

Please see the accompanying service pack note for further details.

ZM60_000322_000   Update individual PDF Format Document Options.

PDF Format Documents New Option [gx18726]
_____

This service pack introduces a new option within the PDF backdrop

system settings for the following document types.
Creditors Ledger Remittance Advices.
Debtors Ledger Customer Statements.
Purchase Orders.
SOP Quotations.
SOP Acknowledgements.
SOP Delivery Notes.
SOP Invoices (including pro-forma invoices).
SOP Credit Notes.
If the new option (labelled Generate <document name> in PDF format by
default?) is set the document type is generated in PDF format by
default regardless of the system wide option that allows all reports
to default to PDF format (where available).
Please see the note accompanying this service pack for full details of
the new feature.
Please note, the generation of documents in PDF format requires an
up-to-date copy of either PDF_In-The-Box or All_In_The_Box to be
present on each GX client used to perform the document generation.

ZM60_000323_000   Product Notes.

Product Notes [gx18748]
───

This service pack introduces the ability to enter notes for products.

Please note, the following features are only available at sites
configured to use the extension database (see service pack
ZM60_000259_000 for details).

Product details entry has been extended to include a new button
labelled Notes, when pressed product notes can be viewed and
updated. It has also been updated to include an indicator (Notes)
to show when a product has notes.

Product enquiries and the standard product searches have been extended
to include a new button labelled Notes, when pressed product notes
can be viewed and updated. They have also been updated to include an
indicator (Notes) to show when a product has notes.

Purchase Order Processing Order Entry parameters have been extended to
include a new option labelled Automatically display product notes
when products are selected? . When set purchase order entry shows
notes for products as they are selected.

Sales Order Processing Order Entry (Options) parameters have been
extended to include a new option labelled Automatically display
product notes when products are selected? . When set sales order entry
and the SOP transaction desktop show notes for products as they are
selected.

Please see the accompanying service pack note for further details.

This GSP is part of the following Group

ZM60_000326_000   Maintain Exchange Rates

Exchange Rate Maintenance [gx18762]
───

A new option labelled Maintain Exchange Rates has been added to the
General Ledger, Debtors Ledger, Creditors Ledger and Cash Manager
menus (within the System Maintenance sub-menu). This allows exchange
rate maintenance to be accessed from outside of System Parameters.
The new options are served by a single authorisation point.

In addition a new window has been added (labelled Conversion
Currency). The new window appears in between selecting the exchange
rate table and actually maintaining the rates. It contains a single
prompt (labelled Currency to convert to) and allows the exchange
rate maintenance window to be limited to conversion rates between two
specific currencies. The new prompt can be left blank to allow
conversion rates to be maintained between the initially selected
currency and all other currencies.

Please note, the menu file for General Ledger/Debtors Ledger/Creditors
Ledger/Cash Manager has been updated to include the 'Maintain Exchange
Rates' option in the System Maintenance menu.

Please copy GL-Menus/DL-Menus/CL-Menus/CM-Menus from your program unit
($P) to your data unit (GLD/DLD/CLD/CMD) after applying this Service
Pack. This step is not required if service pack ZM60_000080_000 has
been applied and unit 'G3M' has been assigned to your program unit
($P).

Please see the accompanying service pack note.

ZM60_000328_000   Update to Intrastat for Electronic Filing.

Produce Intrastat Declarations [GX18751]
──

From 1st April 2012, electronic submission of Intrastat declarations
becomes mandatory. HMRC will not accept Intrastat declarations on
paper forms (C1500 and C1501) after this date.

After 1st April 2012 HMRC will only accept Intrastat declarations in
the following formats:

Online form - The user can manually file their declarations via an
online form.

CSV off line form The submissions can be uploaded from a CSV file.

EDI The submissions can be filed via an EDI message file (either as
email attachments or via x400 public network).

The Print Final SSD   report has been renamed as Produce Intrastat
Declarations and updated as follows:

The dialogue has been revised.
The option to print the report has been retained for those users that
wish to manually file their declarations via the online file.
A new option has been provided that allows a CSV format submission
file to be generated.
The generation of EDI message files is now limited to a single option
that creates an EDI message file which can be submitted as an email
attachment. All other EDI message generation options have been
removed.

Please note, Global 3000 Intrastat generates electronic submission
files; however the user is fully responsible for submitting them. The
 Produce Intrastat Declarations option does not automatically submit
the files to HMRC.

Please see the accompanying service pack note for further details.

Please note, the menu file has been updated to rename the Print Trial
SSD option as Print Trial Intrastat Declarations and the Print
Final SSD option as Produce Intrastat Declarations .

Please copy TX-Menus from your program unit ($P) to your data unit
(TXD) after applying this Service Pack. This step is not required if
service pack ZM60_000080_000 has been applied and unit 'G3M' has been
assigned to your program unit ($P).

ZM60_000330_000        Update to Exchange Rate Maintenance.

Maintain Exchange Rates [D18771]
_____

The example column in exchange rate maintenance has been updated so
that it always shows the example conversion in terms of how much
target currency is equal to 1.00 of the starting currency (for example
if converting from GBP to EUR the example column will always show as
 1 GBP = nnnn EUR   where nnnn is the exchange rate).

In addition the rates in the window now scroll backwards from the
latest dated exchange rate (for each currency).

ZM60_000339_000   Multiple Bin Handling

Multiple Bin Handling [gx10667]
─────────────────────────────────

Please note, the features described in the following text (and
accompanying service pack note) are not yet available, they are
currently undergoing testing and quality control and will be enabled
in a later service pack.

This service pack introduces the ability to operate multiple bins per
stock location.

Please note, the following features are only available at sites
configured to use the extension database (see service pack
ZM60_000259_000 for details).

The distribution options within system parameters have been updated to
include a new option labelled Multiple Bin Handling . This will
provide configuration options for controlling the use of multiple bins
throughout the distribution modules.

Stock transactions (issues, receipts, returns, adjustments and
transfers) have been updated to take in to account bin numbers for all
stocked products (not just those that are batch tracked).

A new button labelled Zones has been added to location maintenance.
Zones are used to sub-divide stock locations. For example in to
aisles. Stocktakes can be limited to products held within bins
situated at specific zones of a stock location.

A new option labelled Bin Maintenance has been added to the system
maintenance menu within Stock Control. This allows bins to be
created, updated and their contents to be manipulated.

A new option labelled Bin Enquiries has been added to the product
enquiry menu. This allows enquiries upon bins, their contents and bin
movements.

A new option labelled Bin Reporting has been added to the Reporting
menu (within Stock Control). Note, this report is only available in
PDF format.

All places within Stock Control, SOP, POP and Manufacturer that issue,
receive, adjust or transfer stock have been updated to update
quantities recorded within bins where applicable.

Please see the accompanying service pack note for further details.

Please note, printing documents in PDF format requires an up-to-date
copy of either PDF_In-The-Box or All_In_The_Box to be present on each
GX client used to perform the document generation.

Please copy ST-Menus from your program unit ($P) to your data unit

(STD) after applying this Service Pack. This step is not required if
service pack ZM60_000080_000 has been applied and unit 'G3M' has been
assigned to your program unit ($P).

ZM60_000345_000   Manufacturer - Multiple Methods of Manufacture.

Manufacturer Multiple Methods of Manufacture [gx18808]
───
──────────

This service pack introduces a new setting within Manufacturer System
Parameters (Order Entry) labelled Multiple methods of manufacture?.
When the new option is set methods of manufacture can be defined via
a new option in the Manufacturer system maintenance menu.

Product maintenance then allows a separate assembly bill (per product)
to be defined for each method of manufacture.

When entering a works order, the system prompts for the method of
manufacture to be used if the product has more than one method
defined.

Please see the accompanying service pack note for further details.

ZM60_000347_000   Manufacturer - Manufacturing Stages.

Manufacturer Manufacturing Stages [gx18810]
───
This service pack introduces a new setting within Manufacturer System
Parameters (Operating Options) labelled Use manufacturing stages?. A
manufacturing stage is an individual step during the manufacturing
process.

Manufacturing Stages can be defined via a new option labelled
 Manufacturing Stages available from the system maintenance menu.
Manufacturing stages are identified by stage id and description,
further descriptive text in the form of comments can then be assigned
to the stage id and optionally included on the works order report.

Each component line within an assembly list can be assigned to one of

the existing a manufacturing stages. On exit from the assembly list it
is automatically re-sequenced by manufacturing stage (ensuring that
works orders are generated, printed and picked in manufacturing stage
sequence).

Please see the accompanying service pack note for further details.

ZM60_000348_000   Manufacturer - Decimal Places in Assembly Bills

Manufacturer Decimal Places in Assembly Bills [gx18823]

_____

This service pack introduces new options within Manufacturer System
Parameters (Operating Options) labelled Use a minimum number of
decimal places in assembly bills and Minimum number of decimal
places in assembly bills .

When entering component quantities in assembly bills with the new
settings configured, the number of decimal places that can be entered
is the higher of the number specified in the new setting, and that
specified for the component.

Please note, if the new settings are in use then component quantities
in all assembly bills must be expressed in stock units.

Please see the accompanying service pack note for further details.

ZM60_000350_000   Multiple Bin Handling - Bin Reporting.

Bin Reporting [D18836/GX10667]
────────────────────────────────────

This service pack enables the Bin Reporting option which is
available from the Reporting Menu within Stock Control.

Bin reporting is only available in systems configured to use multiple
bin handling. It provides the ability to produce reports (in PDF
format) which show bin details and bin movements.

The new report is only available in PDF format and shows details of
which product s accessory lists and assembly bills a product appears
in. Products included in the report can be selected by location,
product group and/or product range.

Please note, Delivery of documents via email and printing documents in
PDF format requires an up-to-date copy of either PDF_In-The-Box or
All_In_The_Box to be present on each GX client used to perform the
document generation.

Please see the accompanying service pack note for further details.

Bank Details [D18843]
─────────────────────────

Debtors Ledger and Creditors Ledger have been updated so that the
authorisation points covering the amendment of bank details is also
checked when a new account is created.

In addition, when a bank account number or sort code is amended the
system creates a log record to record the change.

ZM60_000352_000   Update to Authorisation System

New SOP Authorisation Point [D18846]
───

A new authorisation point (SO_MAN_PRC) has been created. It is
checked by Sales Order Entry and the SOP Transaction Desktop in
systems configured to allow the sales of un-priced goods and manual
pricing. It can be used to prevent individual users from changing the
price of goods whilst processing orders.

ZM60_000358_000   SOP Transaction Notes.

SOP Transaction Notes [gx18850]
———————————————————————————————————
This service pack introduces the ability to enter notes for sales
orders and quotations, SOP credit notes and SOP directly entered
invoices. They cannot be entered for repeating sales orders.

Please note, the following features are only available at sites
configured to use the extension database (see service pack
ZM60_000259_000 for details).

Sales Order Entry (Header Details window) and the SOP Transaction
Desktop (Transaction Details window) have been extended to include a
new button labelled Notes, when pressed transaction notes can be
viewed and updated. They have also been updated to include an
indicator (Notes) to show when a SOP transaction has notes.

SOP enquiries and the standard SOP searches have been extended to
include a new button labelled Notes, when pressed transaction notes
can be viewed and updated. They have also been updated to include an
indicator (Notes) to show when a transaction has notes.

Sales Order Entry and the SOP Transaction Desktop have been extended
to include a new option to enable transaction quotes to be copied when
a transaction is copied.

Sales Order Reporting (Report Options) has been extended to include a
new option labelled Include transaction notes? . When set transaction
notes are included on the report.

Please see the accompanying service pack note for further details.

ZM60_000359_000   SOP Automatic Delivery Charges

Transaction Desktop   Automatic Delivery Charges   [gx18853]
───

This service pack introduces a new function named Delivery Charges
has been added to the SOP System Maintenance menu. The new option
allows the user to define a table consisting of up to ten levels of
transaction weight or transaction value and the delivery charge
associated with each level. It also allows the product to be used as
the delivery charge to be defined. A fixed delivery charge value can
be specified for transactions where the delivery address is overseas.

When the addition of a new SOP transaction is completed, the SOP
Transaction Desktop will check to see if the system has been
configured with a table of delivery charges; if it has it will
calculate the delivery charge based on the transactions weight or
value and add a line for the delivery charge product with the correct
value.
When amendments to an existing SOP transaction are completed, the SOP

Transaction Desktop will check to see if an automatically calculated
delivery charge has already been applied to the transaction (and not
manually deleted); if one has then its value will be recalculated.

Authorisation point SO_DEL_CHG has been created to control whether
or not users can amend automatically generated delivery charges before
they are applied or delete them once they have been applied.

Please note these changes are only available within the SOP
Transaction Desktop, they will not be included in Sales Order Entry.

Please copy SO-Menus from your program unit ($P) to your data unit
(STD) after applying this Service Pack. This step is not required if
service pack ZM60_000080_000 has been applied and unit 'G3M' has been
assigned to your program unit ($P).

Please see the accompanying service pack note for further details.

ZM60_000364_000   Stock Queue - Various Fixes.

Stock Queue Various Fixes [D18866/D18867/D18868]
───
If an SOP order line has a blank required date then this indicates
that the line is required A.S.A.P., for queued products with the
allocation method set to Reserve/Allocate/Request this is being
ignored and if there are purchase orders available the stock is being
reserved even if there is free stock available for allocation.

The stock forecast enquiry has been updated for queued products; it
now includes the reserved quantity for purchase orders.

The following places have been updated to include a new button which
gives access to the stock forecast enquiry (for the product/location).

        SOP manual allocation,
        SOP supply and demand windows,
        SOP stock queue entries window,
        POP order entry (request browse).

ZM60_000365_000   Update to SOP Automatic Allocation.

Automatic Allocation Re-Reserve Purchase Orders [gx18878]
───
-
This service pack introduces a new setting within Automatic
Allocation. The new setting (labelled Re-Reserve purchase orders?)
only applies to queued products. When set automatic allocation checks
for new purchase orders that are expected earlier than the earliest
purchase order that has been reserved against; if one is found all
reservations are converted to requests and the stock queue for the
product is re-processed to ensure that the oldest SOP transaction
lines are satisfied first. This change does not affect the queue
records created by Global 3000 Manufacturer for works order lines.

This service pack also solves a problem whereby sales order entry and
the SOP transaction desktop are not making reservations against
incoming purchase orders correctly. This relates to products with a
queue allocation method of reserve/allocate/request.

Please see the note accompanying this service pack for full details of
the new feature.

ZM60_000366_000   Problem in DL and CL Transaction Entry.

Debtors Ledger and Creditors Ledger Transaction Entry [D18886]
───
─────────────────
When the system automatically creates a journal to account for
exchange gain/loss it should be dated the same as the receipt (DL) or
payment (CL) transaction that gave rise to the exchange gain/loss.

ZM60_000367_000   Update to BACS File Creation.

BACS Filename [GX18889]
───────────────────────────

A new option has been added to the BACS details window (available from
the bank details window within Company Parameters/Cash Book Control
Accounts).

The new option is labelled Allow the filename to be amended when BACS
files are generated? .

When set, the BACS filename and path can be changed when the BACS file
is generated.

For further information please see the enhancement note accompanying
this service pack.

ZM60_000368_000   Collation of PDF Format Customer Statements

Collation of PDF Format Customer Statements [gx18880]
───
─────
This service pack introduces a new system setting within System
Maintenance, Debtors Ledger, Statement Print Options, Statement
Options PDF/Email. The new setting allows PDF format customer

statements to be collated into a single file when printing.
Please see the note accompanying this service pack for full details of
the new feature.
Please note, the generation of documents in PDF format requires an
up-to-date copy of either PDF_In_The_Box or All_In_The_Box to be
present on each GX client used to perform the document generation.

Important Note:
═════════════

This service pack group includes a new version of the DL PDF Format
Statements DLM, D3XPPR. The new version of this DLM is incompatible
with previous versions. This incompatibility will not affect most
sites but will result in a Resolver Error at those sites that are
currently using a tailored version of D3XPPR.

If you have a tailored of the D3XPPR DLM then, after applying this
service pack, you must either re-apply your tailoring to the latest
S.D3XPPR (available upon request from Global Support); or apply the
changes to the standard D3XPPR included in this service pack to your
tailored version of S.D3XPPR. These changes are fully documented in
the Service Pack notes.

ZM60_000369_000   Partially Hold Creditors Ledger Invoices.

CL - Held Invoices [GX18904]
_____

The Item Selection window within Hold/Release Transactions has
been updated to include a new button labelled Partial Hold which is
only available for posted invoices. When the new button is pressed
the user is able to specify the amount of the invoice which is to be
held. Please note when an invoice is partially held the value that is
not held is available for payment.

Auto-Payments has been updated so that when the Automatic Selection
or Add to Run options encounter an invoice with a partial held
amount the un-held amount is automatically selected for payment
(assuming the invoice qualifies for selection).

Allocation has been updated so that partially held amounts are taken
in to account when determining the outstanding amount of invoices.

Attempting to pay (via allocation or auto-payments) more than the
un-held amount of a partially held invoice will (after user
confirmation) un-hold and release the entire invoice.

Auto-Transfer has been updated to allow incoming invoices to be
partially held.

For further information please see the enhancement note accompanying
this service pack.

ZM60_000376_000   Update to SOP Delivery Details.

SOP Delivery Details [GX18924]
─────────────────────────────────

The Delivery Details windows within Despatch Confirmation and
Customer Delivery Confirmation have been updated to capture extra
information. The additional information consists of a tracking
reference, description for the delivery method, route number, expected
arrival date, despatched by operator and a contact reference for the
courier.

In addition a new button labelled Despatch Notes has been added to
the window. When pressed free format despatch notes can be viewed and
amended.The despatch notes relate to the current delivery note, if
the delivery note has not yet been printed (i.e. the deliveries are
currently allocated to delivery note number zero) the despatch notes
are moved to the next delivery note when it is printed.

Please note, the free format despatch notes feature is only
available at sites configured to use the extension database (see
service pack ZM60_000259_000 for details).

For further information please see the enhancement note accompanying
this service pack.

ZM60_000392_000   Audit Database/Account Auditing.

Audit Database [gx18059]
─────────────────────────────────────

This service pack introduces an extra audit database. The audit
database (DBAUDT) will be used to further develop the applications
auditing processes.

The audit database is enabled via a new system parameter (within
Administration Parameters Operating Options). When the audit
database is initially enabled an empty database must be created (this
is done automatically if your data is held in Pervasive SQL format but
must be done manually for data held in Microsoft SQL format) in the
same location and format as the PARAS database).
When manually creating the audit database, it should be noted that the
audit database is a DBX format database and should be generated using
$DXU. The dictionary is DIAUDT located on $P and the schema file
(DBAUDT) should be created on the same unit as DBPARAS (PAD).
Please Note: As the audit is a DBX format database and as such is not
available at sites where data is held in either Native or C-ISAM
format.

Note: This service pack installs a new version of database DBDATA on
unit $P, this should be moved to the PAD data unit overwriting the
version of DBDATA that currently resides there.

Please see the accompanying service pack note for further details.

Post Application Text

Note: This service pack installs a new version of database DBDATA on
unit $P, this should be moved to the PAD data unit overwriting the
version of DBDATA that currently resides there.

ZM60_000399_000   General Ledger Journal Auditing

GL Journal Auditing [gx18995]

_____

This service pack introduces full field auditing for General Ledger

journals.

Please note, the following features are only available at sites

configured to use the audit database. The changes are controlled by a

new General Ledger system parameter (labelled Audit journals).

Each change to a field within General Ledger transaction entry is

individually recorded on an audit record.

A new option labelled Journal Auditing Enquiry has been added to the

Enquiries Menu, the audit enquiry lists the field change audit
records.

A new option labelled Journal Auditing Report has been added to the

Enquiries Menu, the audit report (which can only be produced in PDF

format) lists the field change audit records.

Please see the note accompanying this service pack for further
details.

Please note, Delivery of documents via email and printing documents in

PDF format requires an up-to-date copy of either PDF_In_The_Box or

All_In_The_Box to be present on each GX client used to perform the

document generation.

Please copy GL-Menus from your program unit ($P) to your data unit

(GLD) after applying this Service Pack. This step is not required if

service pack ZM60_000080_000 has been applied and unit 'G3M' has been

assigned to your program unit ($P).

Note: This service pack installs a new version of database DBDATA on

unit $P, this should be moved to the PAD data unit overwriting the

version of DBDATA that currently resides there.

ZM60_000403_000   Debtors Ledger / Creditors Ledger - End of Period

Debtors Ledger/Creditors Ledger Close Period [D19025]
_____

Close Period in Debtors Ledger & Creditors Ledger requires exclusive
use of the DL or CL database.
This service pack displays information about other users that are
already accessing the database, preventing Close period from being
run.

Please Note
_____

Although this service pack can be applied on any version of GSM the
changes introduced will only be visible with GSM SP-30, or later. If
the GSM version is SP-29, or earlier, this service pack will have no
obvious effect.

ZM60_000404_000   Session Handling in Debtors and Creditors.

Sessions Removed [GX18897]
_____

This service pack removes the Close Session function along with all
references to Sessions . It also renames the Daybook Report as the
 Audit Report and moves it to the End of Period Menu. The changes
apply to both Debtors Ledger and Creditors Ledger.

The changes are as follows:

The daybook report has be renamed as the Audit Report and moved from
the Transaction Entry menu to the End of Period menu.

All references to the Daybook have been replaced with Audit , for
example the daybook sequence number is now the audit report number.

Options to produce the aged transactions report, trial balance (by
company), customer statements (Debtors Ledger only) and the audit
report have been added to the End of Period function.

A new system parameter has been added to the Ledgers operating
options. It is named Audit report must be printed before period can
be closed . When set (the default), the period cannot be closed until
the audit report has been printed. When not set, close period will
automatically mark all transactions that have not been printed on an
audit report as having been included on the latest audit report and
increments the audit report number. This means that historical audit
reports can be produced regardless of the new parameters setting.

Close session has been removed from the Transaction Entry menu.

The Session button within the transaction entry batches window has
been replaced with a Filters button that gives greater control over
the batches listed. All references to sessions have been removed.

The current session totals shown within the company period totals and
on the company period totals report have been replaced with totals
relating to un-posted transactions.

For further information please see the enhancement note accompanying
this service pack.

Please copy DL-Menus/CL-Menus from your program unit ($P) to your data
unit (DLD/CLD) after applying this Service Pack. This step is not
required if service pack ZM60_000080_000 has been applied and unit
'G3M' has been assigned to your program unit ($P).

ZM60_000406_000          SOP - Update to Handling of Non-Stocked Products.

SOP  Back Order Non-Stocked Products [gx19031]
```
_____

This service pack updates the SOP to allow order lines for non-stocked
products to be back ordered and therefore part delivered and part
invoiced.

Please see the accompanying service pack note for further details.

POP Unconfirmed Receipts [gx19036]
───────────────────────────────────────

This service pack improves the use of unconfirmed receipts within
Purchase Order Processing.

Goods receipt has been updated to list existing orders for a delivery
reference when one is entered in the initial Document References
window.
POP Enquiries has been updated to provide a new enquiry listing
receipts by delivery reference and to update the existing enquiry
windows to hi-light unconfirmed receipts.

Please see the note accompanying this service pack for further
details.

ZM60_000408_000   Update to DL and CL Purge Settings.

Purge Options [gx19040]
_____

This service pack changes the way the history options and purge
processing operate.

A new system parameter has been added to the Ledger history options.
The new parameter (which is company dependent) controls whether
transaction purge can be selected either via the purge function or the
purge option available when a financial period is closed.

All system settings that control the length of time that transaction
history is retained have been changed from holding a number of
financial periods to holding a number of financial years. The current
settings will be automatically converted from periods to years and
rounded up to a whole number of years as part of the process.

Warning: The conversion of the history parameters from number of
periods to number of years takes place the first time a
Debtors/Creditors Ledger program is run after the service packs are
applied. You must ensure that you check the converted parameter
settings to ensure that they meet your business requirements.

Close period has been updated to automatically archive complete
transactions rather than only archiving transactions if the option to
purge is selected.
Please see the note accompanying this service pack for further
details.

```

DL Credit Claim Processing [gx19059]
_____

This service pack introduces a new function available from the Debtors
Ledger transaction entry menu. The new function (named Credit Claim
Processing) is used to process and complete credit claims.

In addition, A new setting has been added to system parameters
(transaction entry options). The new option (labelled Only allow
completion of fully settled credit claims) can be used to prevent
credit claims from being completed unless their agreed claim amount
has been fully settled by credit notes.

Please copy DL-Menus from your program unit ($P) to your data unit
(DLD) after applying this Service Pack. This step is not required if
service pack ZM60_000080_000 has been applied and unit 'G3M' has been
assigned to your program unit ($P).

Please see the accompanying service pack note for further details.

DL Transaction Entry - Bad Debt Journals [gx19076]
───
This service pack introduces a new batch type selection option. The
new batch type is labelled Bad Debt . A bad debt batch is in effect
a batch of credit journals where the tax is posted to the tax input
account.

Please note, bad debt journals are not specifically identified as such
on reports and show as standard credit journals.

Please see the accompanying service pack note for further details.

ZM60_000416_000   Tax Calculation Changes - Discount.

Tax Calculation Prompt Payment (Settlement) Discount [gx19086]
──
───────────────

HMRC have stated that from 01/04/2015 (01/05/2014 for supplies of
telecommunications and broadcasting services) the calculation of tax
when prompt payment (settlement) discount is offered will be changed
so that the tax is calculated on the full net amount rather than the
discounted net amount. When payment is made, if the prompt payment
(settlement) discount has been taken the tax on the discount amount
can be reclaimed (i.e. tax is accounted for on the consideration
actually received).

To conform to the new legislation you must (UK based businesses)
configure the system (via system parameters, administration, tax
codes, tax options) so that tax is NOT calculated net of settlement
discount and to (via the discount analysis button) calculate
settlement discount on gross invoice values and analyse settlement
discount taken to net and tax.
The system must be configured correctly on either 01/04/2015 or
01/05/2014 depending on the nature of your business. After the
01/04/2015 the system will display a warning (within DL and CL) if the
system is not configured correctly and the selected company is UK
based (i.e. its address country is set to GB).

Please see the accompanying service pack note for further details.

ZM60_000418_000          Tax Rates by Country/BTE Supplies.

Tax Rates by Country/BTE Supplies [gx19119]
─────────────────────────────────────────────
```

This service pack changes the way in which tax rates are handled
throughout the Global 3000 applications. It introduces country based
rate percentages per tax code.

It also includes updates for calculating tax when supplies of
broadcasting, telecommunications and e-services are made to consumers
(rather than businesses).

Please see the note accompanying this service pack for full details.

Please note, prior to these changes each tax code held a single
percentage rate, after applying this service pack the system will
create record for each rate at each tax code for each country in which
a company is defined.

Items Outside the Scope of VAT [gx19125]

This service pack updates the system to allow transactions that are
outside the scope of VAT to be processed correctly.

In addition it introduces a new format VAT Reconciliation Report which
includes an option to export the report to a csv file.

Also the way in which files are exported has changed, instead of
prompting for the path and filename prior to exporting the details a
number of reports now use the windows save as dialogue.

Please see the note accompanying this service pack for full details.

General Ledger Financial Reporting - Formatted Spreadsheets/Report
Packs [gx19032]
_____

This service pack provides the ability to export GL financial reports
as formatted Microsoft Excel spreadsheets. In addition a number of
reports can be grouped together in a 'report pack' and then
printed/exported together.

Use of this functionality is recommended however it does require some
initial system set-up and configuration which is detailed in the note
accompanying this service pack.

Please copy GL-Menus from your program unit ($P) to your data unit
(GLD) after applying this Service Pack. This step is not required if
service pack ZM60_000080_000 has been applied and unit 'G3M' has been
assigned to your program unit ($P).

Please see the note accompanying this service pack for further
information.

Post Application Text

Please read the accompanying service pack note for
set-up/configuration details.

EC Sales List PDF Format Detailed Report [gx19179]
───

This service pack introduces a new PDF format version of the EC Sales
List. The PDF format version is a detailed report that lists the
transactions that contribute to the supply values. The values printed
on the detailed report are not truncated.

Please note, printing reports in PDF format requires an up-to-date
copy of either PDF_In_The_Box.dll or All_In_The_Box.dll to be present
on each GX client used to perform the document generation.

Please see the accompanying service pack note for further information.

ZM60_000446_000   Creditors Ledger Withholding Tax.

Creditors Ledger Withholding Tax [gx19238]
───

In a number of countries (Ghana for example) companies are expected to
deduct and withhold income tax when suppliers are paid. Withholding
tax is deductible from payment for the supply of goods and services,
and other payments.

Withholding tax is not related to transaction tax handing (e.g. UK
VAT).

New system and supplier options have been added to configure suppliers
to withhold tax. Withheld tax is calculated during allocation and then
used during posting to create system generated journals.

Please see the accompanying service pack note for further information.

ZM60_000450_000          Update to CL Auto-Payments.

Creditors Ledger Auto-Payments [D19267]
─────────────────────────────────────────────
```

This service pack updates the reporter extract file created when
cheques are printed to include the cheque value in full words. For
example if the cheque amount is 4325 the extract file will contain the
text Four Thousand Three Hundred and Twenty Five .

The standard cheque print has not been updated and the new details are
included in the extract file for reseller tailoring purposes.

Post Application Text

Please note, after applying this service pack any tailored
auto-payment reporter reports (CL140T, CL140U, CL140V, CL140W, CL140X,
CL14XA or CL140Y) need to be recompiled with the updated UP record
held in the S.PRINT copy library included in this service pack.

ZM60_000451_000          Problem in DL and CL Transaction Enquiries.

Debtors Ledger and Creditors Ledger Transaction Enquiries [D19269]
───────────────────────────────────────────────────────────────────
_____

In a number of the transaction enquiry windows the outstanding value
of the transaction is being reduced by the value of un-posted
allocations. This service pack addresses this so that the outstanding
value of transactions displayed in enquires matches the outstanding
value when they appear on reports.

In addition the  Drill Down  transaction enquiry window has been
updated to show the value of any un-posted allocations.

ZM60_000454_000   CL and DL Transaction Revaluation.

Transaction Revaluation [gx18500]
──

A new option labelled Transaction Revaluation has been added to the
 End of Period Processing menu within Debtors Ledger and Creditors
Ledger. This new function allows the outstanding value (in base
currency) of foreign currency transactions to be recalculated using
the exchange rates in force on a user specified date. During
revaluation, journals are created to record any exchange gains or
losses and adjust the outstanding value (in base currency) of the
revalued transactions.

Please see the accompanying service pack note for further information.

Please copy DL-Menus and CL-Menus from your program unit ($P) to your
data units (DLD and CLD) after applying this Service Pack. This step
is not required if service pack ZM60_000080_000 has been applied and
unit 'G3M' has been assigned to your program unit ($P).

ZM60_000465_000          Update to Creditors Ledger Cheque Printing.

Creditors Ledger Cheque Print [D19324]
```
_____

```
Some banks require that the numeric value printed on cheques is
formatted with a maximum of two leading asterisks, has the pounds and
pence separated by a hyphen rather than a full stop and has one or two
trailing asterisks. This service pack updates the reporter extract
file passed to the cheque and combined cheque/remittance reporter
reports to include a new field which holds the value formatted in this
way.

Post Application Text

Tailored versions of the CL auto-payment reporter reports and
documents will need to be recompiled with the latest version of
S.PRINT which is included in this service pack group.

ZM60_000467_000   Update to Product Maintenance/Enquiries.

Multiple Bin Handling [D19331/D19333]
_____

The stock details windows in product maintenance and product enquiries
have been updated to include a new field named Held In . The new
field which is only available in systems configured for multiple bin
handling shows the count of bins that hold the product or the actual
bin number in cases where the product is held in a single bin.

In addition, if the PDF format stocktake report is printed (not in bin
sequence) in systems configured for multiple bin handling it has been
updated to include a new column labelled Held In (set as above).

ZM60_000472_000   Update to DL and CL Allocation Batches.

Debtors Ledger and Creditors Ledger Transaction Entry Allocation

Batches [gx19335]

The Allocation With Discount and Allocation Without Discount batch
types within transaction entry have been replaced with a single
 Allocation batch type which is controlled via a new system parameter
labelled Disable allocation with discount . By default, the
allocation option will create a special payment/receipt batch for
allocation purposes. If the new parameter is set standard allocation
batches are created, however transactions with settlement discount
cannot be selected.

Note, if you currently solely use Allocation Without Discount style
batches you will need to set the new parameter.

Please see the accompanying service pack note for further details.

ZM60_000478_000   Changes to Posting Cash Manager Batches.

Cash Manager Batch Posting [D19377]

In some cases, weird and large exchange gain/loss postings are
occurring in Cash Manager batches for no apparent reason. Given the
problems this is causing, the software has been changed from
auto-generating the exchange gain/loss to simply detecting it and
instructing the user that they need to revalue the cashbook.

We would suggest that users with foreign currency cash books, Revalue
Cash Books as part of their period end procedures.

SOP/POP Direct Orders [gx19375]
_____

A new system parameter (labelled Generate direct purchase orders for
direct sales orders?) has been added to the SOP Operating Options.
When set, purchase orders are automatically created for products when
a direct SOP order is entered and cannot be invoiced until the
corresponding purchase order has been fully invoiced.

Please see the accompanying service pack note for further details.

Purchase Order Processing Invoice Input [D19378/79/80/81/86]
_____
_____

The trading terms code has been moved to the main invoice details
window.

It is no longer possible to analyse purchase invoices to the EC Sales
tax code.

When entering tax analysis, the indicator for intra-EC acquisitions
has been improved.

The supplier product code and description is now shown when purchase
order lines are listed.

It is now possible to part invoice direct orders.

ZM60_000481_000   Various Creditors Ledger/Debtors Ledger Problems.

Various Problems in Debtors and Creditors Ledger [D19391/2/3]

If settlement discount is analysed to net and tax the auto-allocate
option does not work when allocating transactions via an allocations
batch.

If settlement discount is analysed to net and tax the ability to write
off small differences during allocation is not available.

If company period totals are compared against the General Ledger
during close period, it is no longer possible to post batches (that
include Cash Manager postings) if the Cash Manager is more than two
periods behind the Debtors/Creditors Ledger.

Period Locking For Resellers [D19397]
─────────────────────────────────────────────────────
This service pack has been created for reseller purposes. It updates
GL, DL, CL and CM transaction entry to prevent new batches being
created from a reseller specified financial period onwards. This is to
allow resellers to conduct maintenance on end user systems without
them adding new transactions.  After applying the service packs frame
 PDLOCK  will be available on the users program unit, this can then be
used to set the period and year to be locked.  Once the maintenance is
complete  PDLOCK  can then be run again to set the lock period/year to
```

zero.

ZM60_000495_000          Update to DL and CL Transaction Enquiries.

Debtors Ledger and Creditors Ledger Transaction Enquiries [GX19455]
──────────────────────────────────────────────────────────────────
──────────────────────
```

The Debtors Ledger and Creditors Ledger transaction enquiry windows
have been updated to include a new button labelled Filters . The new
button allows the transactions listed to be controlled based on their
type or entry date.

The account (customer and supplier) enquiries have also been updated
to replace the existing combination of the Transactions button
followed by the Select Type menu with a new bank of buttons (located
below the Look-up group box) which can be used in conjunction with
the new transaction filters button.

Please note, after applying this service pack system generated
exchange gain/loss journals (including those created via transaction
revaluation) are excluded from enquiries by default. However, they can
be included via the new Filters button if required.

For further information please see the enhancement note accompanying
this service pack.

```

Inactive Accounts [gx19456]
———————————————————————————————————

This service pack introduces a new setting within chart of accounts
maintenance. The new setting holds an accounts status which can be
either Active or Inactive .

Inactive accounts are automatically excluded from account searches,
chart of account maintenance and account enquiries. A new button has
been added to account enquiries and chart of accounts maintenance to
allow Inactive accounts to be included in the list.

Please note, all existing accounts are assumed to be Active until
they are specifically set to Inactive .

ZM60_000503_000   Updates to all of Asset Register

Updates to all of Asset Register [D19250]
_____

Asset Register has been updated to the latest presentation standards
in many cases merging several windows into one.

Direct Postings to General Ledger (as per Creditors Ledger, Debtors
Ledger and Cash Manager) has been introduced. As a result,
 Transaction Entry has been completely revised including new
dialogue. For details, see the attached documentation.

Due to the large number of changes, the Asset Register Manual has been
fully revised to reflect the latest changes.

PLEASE NOTE.

The first time you create a posting to GL, the system will
automatically update the interface. You should therefore ensure that
all postings have been included in posting files and they have been
imported into General Ledger.

```
Please copy AR-Menus from your program unit ($P) to your data unit
(ARD) after applying this Service Pack. This step is not required if
service pack ZM60_000080_000 has been applied and unit 'G3M' has been
assigned to your program unit ($P).

ZM60_000508_000   Problems in Multiple Bin Handling.

Multiple Bin Handling [D19502/D19503/D19504]
_____

This service pack solves the following problems in systems configured
to allow multiple bin handling.

There is no option to add stock to a new bin whilst receiving
serialised products.

Stock Transfers do not prompt for a new bin if the product is not held
in any bins at the location the stock is being transferred into.

The confirmation window showing the bins in which stock has been
placed should not be displayed if the option to automatically receive
the stock is chosen and the product is held in a single bin.

If the bin number is manually entered (after clearing the window) in a
select window it should automatically be converted to upper case.

ZM60_000510_000   Update to GL Open Year.

GL Open Year [gx19507]
_____

This service pack updates Open New Financial Year so that opening
balances are automatically transferred (if accounts are automatically
enabled).

In addition, changes have been made to update the opening balances in
future years when transactions are posted. E.g. if a journal is posted
in year 2018 the opening balance for the account in year 2019 is
updated (if year 2019 is open).

Also, it is now possible to enter past period journals within
transaction entry.

Please see the accompanying service pack note for further information.

ZM60_000512_000   Updates to POP Parameters.

Updates to POP System Parameters [D19520]
───

In POP parameters, variances, the post cost variance to stock value
parameter should only be set to "N" and suppressed if costs are not
posted to GL in a standard costing system.
The Post variance to stock value ? POP parameter has been renamed as

 Create stock movements for price variances? to reflect more
accurately what it does. The details text has been updated
accordingly.

ZM60_000513_000   Update to SOP Payment Methods.

SOP Payment Methods [gx18918]
——
The following functions and options have been removed:

SOP Sales Order Entry Credit Card Payments,
SOP Transaction Desktop Credit Card Payments,
SOP Credit Card Processing On-line Authorisation,
SOP Credit Card Processing Manual Authorisation,
SOP Credit Card Processing Payment Submission,
SOP Credit Card Processing Voice Referrals,
SOP Credit Card Processing Removed Payment Requests,
SOP Credit Card Processing Credit Card Maintenance,
SOP System Parameters Credit Card Prefixes,
Administration Parameters System Codes/Credit Card Types.

The payment method for SOP transactions can now be set to one of
 Normal , Cash , Credit/Debit Card , Cheque , Online   or Other .

If the payment method for a transaction is normal SOP invoice print

posts an invoice to Debtors Ledger, the customers   payment must then
be recorded by entering a manual receipt in Debtors Ledger. For all
other payment methods the user must confirm that payment has been
received before goods can be despatched/invoiced. SOP invoice print
then posts an invoice and receipt to Debtors Ledger which are
allocated to each other (for foreign currency transactions the receipt
is generated using the same exchange rate as the invoice).

Note, if (prior to invoicing) multiple despatches are made for a
transaction with a payment type that is not normal , payment is only
confirmed for the first despatch and a single receipt encompassing the
entire amount invoiced is posted to Debtors Ledger.

Please copy SO-Menus from your program unit ($P) to your data unit
(STD) after applying this Service Pack. This step is not required if
service pack ZM60_000080_000 has been applied and unit 'G3M' has been
assigned to your program unit ($P).

Please see the accompanying service pack note for further details.

ZM60_000514_000          Update for Data Protection (GDPR).
```

Data Protection (GDPR) [gx19515]
───

NOTE: When used as intended these changes provide options that
alongside procedures managed outside of Global 3000 allow a business
using Global 3000 to comply with the General Data Protection
Regulation (GDPR). The existence of these changes do NOT imply that a
business using Global 3000 is GDPR compliant.

This service pack introduces new system parameters to enable data
protection controls and allow the location of the data retention
policy and privacy notice documents to be specified, these can then be
viewed whilst creating/amending Customer or Supplier contact details.

A new Data Protection window now appears immediately after a
Customer or Supplier contact record is created or updated. This allows
users to record and update the privacy and data retention options for
the contact.

A new Data Protection Maintenance option has been added to system
parameters (within the administration options). This allows users to
manage the data protection preferences for contacts (either
individually or in bulk).
When data protection controls are initially enabled, the system will
prepare the data by assuming that none of the existing contacts have
opted in to data retention, receiving marketing material, sharing
information with third parties or being aware of the privacy
statement. The new Data Protection Maintenance function can then be
used to update the contacts in bulk to reflect their correct status.

Note, the new data protection controls require a new phase to be added
when a Debtors Ledger or Creditors Ledger period is closed. This will
inevitably cause close period to take extra time to complete.

Please see the accompanying note for further details.

ZM60_000518_000   Update to CL Auto-Payments.

CL Auto-Payments [gx19510]
─────────────────────────────────────
This service pack introduces the ability to generate a Barclays
Business Master format payment file via Creditors Ledger
auto-payments.

Two new (cash book dependent) system parameters have been added to the
 BACS section of the Cash Book Control Account system parameters.
When the first new parameter (labelled Replace BACS payment file with
bank payment file?) is set a bank specific payment file is created in
place of the BACS format payment file (this only applies to suppliers
configured for payment by BACS transfer/Payment File). The second
parameter controls the format of the payment file; initially it can
only be set to generate a payment file for processing via Barclays
Business Master and has been included so that in the future different
file formats can be catered for.

Auto-Payments will be updated to check the new parameter and if it is
set, all payments that would have previously been made via BACS will
be added to bank payment file of the selected format.

Please see the note accompanying this service pack for further

details.

ZM60_000519_000   Update to Customer/Supplier Maintenance (GDPR).

Customer/Supplier Maintenance (Further GDPR Changes) [D19547/D19549]
_____

This service pack updates Customer/Supplier Maintenance to validate
that the email addresses used when documents are delivered via email
correspond to an email address on an existing contact. This is so that
it can be anonymised (via the contact) if the owner of the email
address wishes to invoke their right to be forgotten under the GDPR.

In addition, Data Protection Maintenance has been updated to ensure
that the account code is converted to upper case and to solve a

problem whereby deselecting contacts can result in an EXIT 25508.

ZM60_000525_000        Two Problems (DL/CL Enquiries and Bin Transfer).

Two Problems [D19572/D19573]
_____
This service pack includes the following two updates:

DL and CL enquiries have been updated to improve the speed of the
 Outstanding  transactions enquiry (i.e. the transaction enquiry shown
when the  Outstanding  button is pressed).  It should be noted that
once this service pack is applied the  Outstanding  transactions will
be listed in date sequence and will exclude unposted items. In
addition the ability to change  views  is not available.

In some cases when stock is transferred from one bin to another
(multiple bin handling systems) superfluous empty bin movements are
generated.

ZM60_000529_000   Making Tax Digital

Making Tax Digital - VAT [gx19561/gx19584]
──
This service pack updates Global 3000 to meet digital record keeping
regulations.
It also updates the General Ledger so that the VAT reconciliation
report can be used to submit VAT returns electronically via the
Government Gateway.

NOTE: Module GW (Government Gateway Manager) is required to submit VAT
returns electronically (it is included with this service pack).

Please see the accompanying service pack note for further information

Post Application Text

In order to comply with the digital record keeping regulations

introduced as part of the Making Tax Digital rules you must:

1) Ensure that the 'History Options' within Debtors Ledger (if in use)
and Creditors Ledger (if in use) are configured to retain at least six
years transaction history.

2) Configure the 'VAT accounting scheme' for each company within
company parameters.

ZM60_000541_000   Making Tax Digital - Update

Making Tax Digital Fraud Prevention [D19620]
_____

HMRC now require that VAT submissions include various fraud prevention
information. This service pack updates the submission processing to
meet this requirement.

Please note this service pack requires GX V4.7s. In addition, this
service pack updates the P.$SDLM0 DLM library on the master SYSRES
($M). If the DLM load unit ($$D) is different from $M the P.$SDLM0
library must be copied from $M to $$D on all fat clients configured on
the network.

Post Application Text

Please note this service pack requires GX V4.7s.

This service pack updates the P.$SDLM0 DLM library on the master
SYSRES ($M). If the DLM load unit ($$D) is different from $M the
P.$SDLM0 library must be copied from $M to $$D on all fat clients
configured on the network.

ZM60_000543_000   Update to Transaction Desktop for Trade Counters

Transaction Desktop [gx18676]
_____

This service pack updates the Transaction Desktop profile settings to
include a new option labelled Trade counter processing . When set, as
each transaction is completed (via the Finish button) the user is
offered the opportunity to select the next transaction type (limited
to direct invoices or credit notes) which is then automatically
created for the current or default customer account.
In addition the print options available for direct invoices will be
extended to allow delivery notes to be produced.
Please see the accompanying service pack note for further details.

Works Order Created by SOP [D19657]
_____

In some cases the default quantity of Manufacturer Works Orders can be
higher that the quantity required to fulfil the Sales Order.

ZM60_000546_000   Problems with Product Aliases.

Product Aliases [D19664]
─────────────────────────────────────
This service pack solves the following of problems with the handling
of product aliases.

1) The product alias list in Sales Order Entry (accessed when a
product is selected via the product search) is incorrectly including
dummy alias records created when Global 3000 Manufacturer is
configured to use multiple methods of manufacture.

2) The product alias list was not being displayed when a product is
selected via the product search in the SOP Transaction Desktop.

3) In some cases the price as product for product aliases is
ignored.

4) Product enquiries does not have an option to display product
aliases.

5) The sales order lines enquiry does not include the product alias
used for the line.

ZM60_000555_000   Update to Country Codes (EC Taxation).

Country Codes EC Taxation [gx19682]
───

This service pack provides the ability to specify the dates for which
the EC taxation rules apply to a country independently of its EC
membership status.

Note, the first time the software is run after this service pack is
applied any existing countries marked as being EC members will be
configured to have the EC taxation rules applied (perpetually).

Please see the note accompanying this service pack for full details.

ZM60_000564_000   Export Driver Simplification.

Export Driver Simplification [D19694]
──

The Export Driver configuration programs (previously called scenario
maintenance) have been simplified to make them easier to
understand/use.
A new option (default when setting up new export points) has been
added that allows the user to determine where the export file is saved
to in the same way as many of specific exports do.

Please see the accompanying document for further information.

You MUST copy DBDATA and DBDATA 1, from your program unit ($P) to your
data unit (PAD) after appying this service pack.

Please copy CL-Menus, DL-Menus and CM-Menus from your program unit
($P) to your data units (CLD, DLD and CMD) after applying this Service
Pack. This step is not required if service pack ZM60_000080_000 has
been applied and unit 'G3M' has been assigned to your program unit
($P).

ZM60_000571_000   Default Bank Names.

Default Bank Names [D19725]
──────────────────────────────────────

This service pack updates the defaulting of bank names from the sort
code. Once applied, if a bank name is changed and does not match the
system default bank name for the sort code the user is informed and
offered three options.

1) Use the system default bank name in place of the entered bank name.

2) Use the entered bank name.
3) Use the entered bank name and save it for use in place of the
system default (note, this does not affect any existing bank details).

ZM60_000577_000   Update to CL Auto-Payments

Auto-Payments Skip Document Production [gx19746]
──

This service pack updates system parameters to include a new option in
the CL Parameters, Auto-Payments Print Options Window.

The new option is named Skip document production . When the new
option is set, the Post Payments button is enabled (in place of the
 Print Documents button) once the final payments have been confirmed;
all suppliers usually paid by cheque are treated as being paid via
credit transfer regardless of their account settings.

Please see the accompanying service pack note for further details.

ZM60_000578_000   Updates to Attaching PDF Format Files

Attaching PDF Format Files [D19749]
───

These changes introduce 3 new parameters (labelled Auto attach SOP
documents , Auto attach debtors ledger statements and Auto attach
POP documents) in the PDF Format Print Controls window of the
Administration Parameters Operating Options. They control if PDF
Format documents generated by the system are automatically attached to
the relevant transaction/supplier. Previously this was automatic.
Each parameter is only available when the appropriate module is
configured.

ZM60_000583_000   New Debtors Ledger Letter Production Feature.

Letter Production [gx19751]
_____

This service pack introduces a new feature within Debtors Ledger.

The new feature allows multiple letter formats to be created within a
new letter definition function. Letters can then be generated for
either a single customer (within account maintenance/enquiries) or a
range of customers via a new letter production program.
Each letter consists of up to fifteen segments, each segment contains
an item such as the customer address, account balances or free form
text. Most of the items have more than one layout option (for example,
when the date is included in a segment it can be optionally left or
right aligned).

Each letter can (optionally) have its own backdrop.

Note, letters are only produced in PDF format and always in portrait
orientation.

Please see the accompanying service pack note for further details.

Please note, Delivery of documents via email and printing documents in
PDF format requires an up-to-date copy of either PDF_In-The-Box or
All_In_The_Box to be present on each GX client used to perform the
document generation.

Please copy DL-Menus from your program unit ($P) to your data unit
(DLD) after applying this Service Pack. This step is not required if
service pack ZM60_000080_000 has been applied and unit 'G3M' has been
assigned to your program unit ($P).

Please note this service pack includes a 'Font' look-up which requires
GX V4.8o+. In addition, this service pack updates the P.$SDLM0 DLM
library on the master SYSRES ($M). If the DLM load unit ($$D) is
different from $M the P.$SDLM0 library must be copied from $M to $$D
on all fat clients configured on the network.

Post Application Text

This service pack updates the P.$SDLM0 DLM library on the master
SYSRES ($M). If the DLM load unit ($$D) is different from $M the
P.$SDLM0 library must be copied from $M to $$D on all fat clients
configured on the network.

Tax Authorities [gx19780]
─────────────────────────────────────

This service pack introduces a new feature within Debtors Ledger. It
introduces new settings within System Maintenance and Debtors Ledger
which allow sales to be reported to external tax authorities (i.e.
reported to a tax authority which is different to the tax authority of
the country in which the company resides).

Please see the accompanying service pack note for further details.

ZM60_000593_000   Update to CL Auto-Payments.

CL Auto-Payments [gx19804]
_____

This service pack introduces the ability to prohibit Creditors Ledger
auto-payment runs that have a total payment amount exceeding a
specified limit.

A new (cash book dependent) system parameter has been added to the
 BACS/Payments section of the Cash Book Control Account system
parameters. The new parameter is an auto-payment run limit.

Auto-Payments has been updated to check the new limit and if it is set
the Final Payments option is prohibited if the payment run total
exceeds it.

Please see the note accompanying this service pack for further
details.

ZM60_000600_000   Update to SOP Transaction Desktop.

SOP Transaction Desktop [D19836]

This service pack updates the SOP transaction desktop to include two
new authorisation points. The new authorisation points (SO_ALLOCAT
and SO_DEALLOC) can be used to prevent individual users from
allocating and deallocating stock.

ZM60_000602_000   New SOP Function - Order Delivery Statistics.

SOP Order Delivery Statistics [D19858]
_____

This service pack introduces a new function to Sales Order Processing
named Order Delivery Statistics which is available from the Order
Enquiries and Reports menu.

The new function provides the ability to calculate and show the number

of order lines despatched/delivered on time and late (compared with
their required date) within a specified time period.

Please see the note accompanying this service pack for full details of
the new feature.

Please note, the menu file has been updated to add a new option to the
Order Enquiries and Reports Menu (Order Delivery Statistics). Please
copy SO-Menus from your program unit ($P) to your data unit (STD)
after applying this Service Pack. This step is not required if service
pack ZM60_000080_000 has been applied and unit 'G3M' has been assigned
to your program unit ($P).
