

ZO60\_000001\_000 Enhancements + various fixes

Enhancements + various fixesInvoice Input

In some cases invoices fail to post if costs are not being posted to General Ledger.

For service and extra products, when costs are posted to General Ledger or the new systems parameter to validate General Ledger cost of purchases at Purchase Order Entry is "Y", check that the values for General Ledger profit centre and account in force at the end of an input line are valid, and if not prompt for new values.

Purchase Order Entry

This uses a new systems parameter introduced in Company System Parameters to validate General Ledger cost of purchases at Purchase Order Entry which can be set to "Y" if costs are not being posted to General Ledger.

If costs are being posted to General Ledger or the new parameter to validate General Ledger cost of purchases at Purchase Order Entry is "Y", a check is made for a valid General Ledger profit centre and account code when adding products in Purchase Order Entry, and they are prompted for if necessary.

If costs are not being posted to General Ledger and the new parameter is N, the General Ledger profit centre and account are not validated at Purchase Order Entry and may be left blank.

Goods Received Not Invoiced Report

New option to produce a report that sorts and sub-totals goods received not invoiced by the General Ledger codes associated with them.

Z060\_000005\_000 Enhancement to Goods Receipt.

This service pack makes the following enhancements:

#### Improved Batch Receipt

This service pack contains an enhancement to Global 3000 Purchase Order Processing receipt of batch tracked non-serialised products to improve dialogue when receiving individual stock units of the product into separate batches. This enhances traceability of individual product items when using batch movement enquiry features throughout the Global 3000 distribution modules.

#### Goods Received Note

This is an addition to the reporting facilities provided by Global

3000 Purchase Order Processing. The new report referred to as Goods Received Note produces documents suitable for controlling receipt and quality control of incoming goods. The control document format can either list goods received lines and, optionally, associated batch and serial number details or can consist of a single page per line of goods received showing details from the Purchase Order and details from the Supplier Advice relevant to that line.

Z060_000006_000	Various Fixes
-----------------	---------------

This service pack solves the following problems:

Goods Received Note [D16521]

Spelling mistake in the report criteria window.

Purchase Order Entry [D16497]

This enhancement introduces a new system parameter which controls whether directly keyed comments are allowed during purchase order entry. If the new Allow directly keyed comments parameter is set

then the product code can be left blank when entering a purchase order line and its description can then be used as a comment.

#### Purchase Order Print [D16497]

This enhancement introduces a new system parameter which controls whether directly keyed comments are allowed during purchase order entry. If the new Allow directly keyed comments parameter is set then the product code can be left blank when entering a purchase order line and its description can then be used as a comment.

#### New Items Report [D16497]

This enhancement introduces a new system parameter which controls whether directly keyed comments are allowed during purchase order entry. If the new Allow directly keyed comments parameter is set then the product code can be left blank when entering a purchase order line and its description can then be used as a comment. Now prints by order number, order sequence rather than order number, order line.

#### Orders By Supplier Report [D16497]

This enhancement introduces a new system parameter which controls whether directly keyed comments are allowed during purchase order entry. If the new Allow directly keyed comments parameter is set then the product code can be left blank when entering a purchase order line and its description can then be used as a comment. Now prints by order number, order sequence rather than order number, order line.

#### Post Application Text

Z060\_000008\_000 Order Line Descriptions

Goods Received Not Invoiced Report [gx15235]

This enhancement allows product descriptions keyed on the order line when an order is entered, to be printed on the detail lines of the Goods Received Not Invoiced Report by Product. When a product description is entered during Purchase Order Entry it is printed after the delivery note number on the detail line of the report. The description keyed on the order line when the order is entered is printed on the Goods Received Not Invoiced Report by GL Codes and the Goods Received Not Invoiced Report by Delivery Note, rather than the fixed product description.

Z060\_000009\_000 Address Lookup Enhancement.

This service pack makes the following enhancement:

Order Entry [GX160612/D16654]

This is an enhancement of Global 3000 to introduce the use of Postcode Anywhere to provide address lookup based on postcode. (Postcode Anywhere provides access to UK and international addresses, bank data, maps, lifestyle and geographic information. See <http://www.postcodeanywhere.co.uk>.)

Wherever addresses are entered, you may press F1 and enter a postcode to display a list of the addresses in that postcode. Select an address and the details are returned to the address fields in the original window.

Refer to the service pack enhancement notes for group service pack ZM60\_000022\_000 for full details.

ZO60\_000019\_000 Enhancement to Goods Receipt.

Goods Receipt Unconfirm Receipts [GX17248]

This enhancement introduces a new option labelled Unconfirm Receipts to Goods Receipt. Unconfirming a receipt line, reverses the confirmation process taking the receipt line back to the state it was in prior to confirmation. Selecting the new Unconfirm Receipts

option will, offer the user a list of confirmed receipt lines.

Selecting a receipt line to be unconfirmed will:-

Prompt the user for a Supplier Return Reason Code (if required),  
Reduce the stock counts (as per a write-off issue within stock control),  
Post reversals of the GL postings made when the Confirm Receipts option was originally selected.

Please note: It is not possible to unconfirm a receipt if any of the following conditions hold true.

If the receipt was confirmed before this service pack is applied,  
If any of the stock has been issued,  
If any of the stock is frozen for stock-take,  
If the receipt has been invoiced,  
If the purchase order was shipped via Landed Costs,  
If the product is serialised and any of the serial numbers have been suggested on a picking list,  
If the product is batch tracked and any quantity from the batches receipted has been reserved,  
If any of the stock has been reserved or allocated via the stock queue.

Z060\_000020\_000 Creditors Ledger Month End

This service pack makes the following enhancement:

Creditors Ledger Month End [GX16234]

This service pack introduces a new Month End function in Creditors. The new function performs all checks to ensure that a period can be closed (i.e. all batches are posted, the daybook has been printed, the session has been closed and all GL analysis has been posted) . Once these have successfully completed, it lets you choose which period end functions are to be to run and then runs them for you without further instruction. This makes it possible for you to perform the period end functions and complete the period closure from a single screen.

Z060\_000024\_000              Enhancement to allow product selection by barcode.

Barcode Integration [GX16613]

---

This service pack contains an enhancement to Global 3000 distribution software which allows product code entry/selection to be made by scanning (or typing) a product s barcode.

The changes are:

Product maintenance has been updated so that as part of creating or maintaining a product a 40 character barcode can be specified.

Product code entry/selection has been updated to check to see if a barcode has been scanned (or typed) instead of a product code; it

searches the product records for a product with a matching barcode and automatically selects it. Product code entry/selection can be made by scanning (or typing) a product's barcode at the product code prompts in the application functions:-

Stock Control Transaction Entry,  
 Stock Control Stock Take,  
 Stock Requisition Entry,  
 Purchase Order Entry,  
 Purchase Invoice Input (the addition of services and extras),  
 Purchase Order Processing Supplier/Product Maintenance,  
 Sales Order Processing Transaction Desktop,  
 Sales Order Entry,  
 Manufacturer Works Order Entry,  
 Product Enquiries,  
 The standard product search.

Please note: Some barcode scanners supply the scanned barcode in upper or lower case depending on the state of <Caps Lock> key, to combat this barcodes will be held on file in upper case, and the applications always convert the scanned barcode into upper case before attempting to search for products with matching barcodes.

Please also note: Barcode scanners connected via the RS-232 serial port are not supported.

Z060\_000027\_000 Profit Centres For Purchased Services & Extras.

This service pack solves the following problem:

Sites using POP Default profit centre for costs other than stock

This service pack introduces a new Purchase Order Processing system parameter "Default PC for purchased services and extras from ordering location?". The service pack modifies Purchase Order Line Entry and Purchase Invoice Entry of Services and Extras to take the default profit centre for services and expenses added to purchase orders from the blank location rather than the ordering location if the new parameter is switched OFF and no other cost method has been activated for the data entry session.

The new system parameter is switched ON automatically when this service pack is applied, i.e. the default profit centre is taken from the ordering location for extras and services added to purchase orders. To default the profit centre from the blank location for

service and extras added to purchase orders, use system parameter maintenance to switch the new parameter OFF.

Z060\_000031\_000      Various enhancements to SOP and POP

Various enhancements to SOP and POP

Purchase Order Enquiries [D17507]

In some cases whilst enquiring upon purchase order lines, pressing the 'Stock' button shows the purchase order header details rather than the stock details.

Manufactured Goods Enquiry [D17494]

A new "Manufactured Products" option is now available at the product type selection menu that appears after selecting Stock Enquiries. This option restricts the enquiry to manufacturable products only.

Supplier Price Lists in POP [D17338]

This enhancement introduces the ability to define a supplier price list for products ordered through POP or Landed Costs. A new "POP Price Lists" parameter is available to configure the way pop price lists are used.

A new "Price List" sub-menu contains all the price list maintenance and report functions.

Increased pricing accuracy in POP [D17337]

This enhancement introduces the ability to define the pricing accuracy to be used on all products within a selected product group. A unit price can now be defined as having between two and six decimal places. It should be noted that the total line values (total value posted to GL and CL) is still limited to the number of decimal places that are valid for the currency of the order.

The increased pricing accuracy is used in POP price lists, last quoted cost and last invoiced cost.

P.O.P. Posting Options [gx17390]

This service pack significantly enhances control over narrative and comment information passed to both Global 3000 Creditors Ledger and Global 3000 General Ledger on invoices and invoice lines input via Global 3000 Purchase Order Processing in addition to any cost variance postings to General Ledger arising during that input. The enhanced controls appear in a new parameter screen in the P.O.P. section of Company Distribution Parameters. Detailed documentation of the features and operation of the new screen can be found in the enhancement note accompanying this service pack.

Spurious stock level values on new record [17547]

When entering a purchase order for products which have not yet got the appropriate stock record, there is an opportunity to create the stock record on the fly. This does not correctly initialise all the fields on the record, leading to spurious values for stock levels etc.

Z060\_000032\_000 Unit price printed as \*\*\*\*\* on purchase order

Unit price printed as \*\*\*\*\* on purchase order [D17600]

A change to the way unit prices are stored internally means that a change is required to any tailored purchase order print layouts. The report must be edited using reporter and the field printed changed from VIOUPR (an 8.2 field) to VIOUPX (a 13C field).

After applying this service pack a new S.PRINT file can be found on your Global 3000 Program unit. Copy this file to the unit you use to edit reporter reports.

Z060\_000036\_000 Enhancement to long description handling

Enhancement to long description handling [16534]

This service pack fixes problems in Sales Order Processing and Purchase Order Processing.

In SOP, if the user selects order line comments the long description lines are copied from the product and attached to the order line. If the user then deletes these comments they are still printed on the order if the "Copy long descriptions to order?" flag is set.

In POP there is a conflict where the above parameter in Sales Order Processing is being used to control the printing of packaging instructions on Purchase Orders.

Recovery program D16534 which sets the parameters and (optionally) copies the product long descriptions to existing order lines on open orders is provided in this service pack. This should be run when the service pack is applied.

Note: This function increases the requirement for LD records in database PARAS.

See the attached enhancement note for further details.

Z060\_000044\_000 Suppress delivery location prompt in order entry

Suppress delivery location prompt in order entry[17717]

This service pack enhances Purchase Order Processing for single location systems.

A new value of the parameter Purchase Order location input which currently allows At start of session and At start of each order is made available for single location systems, allowing the option Never. If this is set, Purchase Order Entry does not prompt for the delivery location at all, and inserts the single location address into

the order delivery address. If necessary, this may be changed for individual orders by selecting the order for amendment.

## Foreign Currency Domestic Purchase Orders [GX17912]

A new parameter has been added to supplier maintenance to allow foreign currency purchase orders for domestic suppliers trading in a foreign currency. When set purchase orders can be entered, printed and received for the supplier but not invoiced. The invoicing of foreign currency domestic purchase orders must take place within Creditors Ledger and users should take care to ensure that if costs are being posted to the General Ledger, any required postings are made to the goods received not invoiced account via Creditors Ledger.

Z060\_000064\_000 PDF Format/Email Delivery of Purchase Orders

Purchase Order Print [gx18287IDC]

This service pack introduces a new feature in Purchase Order Processing. The new feature allows purchase orders to be printed in PDF format and optionally to be delivered via email. New system and supplier settings have been created to allow the delivery of purchase orders via email to be configured.

Printing purchase orders in PDF format can now be selected via the Print Options window at runtime.

For suppliers configured to receive purchase orders via email, purchase order print automatically generates an email containing the order as a pdf format attachment file and sends it. This is done whenever a purchase order is selected for printing. Provisions have been made within purchase order print to generate a printed copy of an emailed order.

When an order is delivered via email, up to five additional attachment files can be sent, these can be defined in system parameters.

In addition the dialogue within purchase order print has been improved, the main changes are that purchase order print is now controlled via a single main window and that orders selected for printing are listed on screen at all times.

Please see the note accompanying this service pack for full details of the new feature.

Please note, printing purchase orders in PDF format/the delivery of purchase orders via email requires an up-to-date copy of either PDF\_In-The-Box or All\_In\_The\_Box to be present on each GX client used to perform the order generation.

Company Email Addresses [gx18415]

This service pack introduces new functionality when documents are generated in PDF format (for either printing or delivery via email). The new functionality allows alternate email addresses to be used when the company name and address is included on the following documents:

Creditors Ledger remittance advices.  
 Debtors Ledger customer statements.  
 SOP customer facing documents.  
 POP orders.

The alternate email addresses for the above documents are accessed via a new button labelled Email Addresses which has been added to the company details window within system parameters. If any of the above alternate email addresses are left blank the company email address shown on the company details window is used.

Please see the note accompanying this service pack for full details of the new feature.

Z060\_000071\_000 Update to Purchase Order Entry.

Purchase Order Entry - Order Address [gx14421]

This service pack introduces a new button labelled Order Address to the Order Details window (previously titled Order Heading Information ). When the new button is pressed a new window (titled Select Order Address) is displayed, this window lists all of the addresses for the supplier and allows the user to select the address to which the purchase order is to be sent. In addition the new window includes the ability to create a new address for the supplier.

Please see the note accompanying this service pack for full details of the new feature.

Z060\_000084\_000 Update individual PDF Format Document Options.

PDF Format Documents New Option [gx18726]

This service pack introduces a new option within the PDF backdrop system settings for the following document types.  
 Creditors Ledger Remittance Advices.  
 Debtors Ledger Customer Statements.  
 Purchase Orders.  
 SOP Quotations.  
 SOP Acknowledgements.  
 SOP Delivery Notes.  
 SOP Invoices (including pro-forma invoices).  
 SOP Credit Notes.  
 If the new option (labelled Generate <document name> in PDF format by default? ) is set the document type is generated in PDF format by default regardless of the system wide option that allows all reports to default to PDF format (where available).  
 Please see the note accompanying this service pack for full details of the new feature.  
 Please note, the generation of documents in PDF format requires an up-to-date copy of either PDF\_In-The-Box or All\_In\_The\_Box to be present on each GX client used to perform the document generation.

Z060\_000085\_000 Product Notes.

Product Notes [gx18748]

This service pack introduces the ability to enter notes for products.

Please note, the following features are only available at sites configured to use the extension database (see service pack ZM60\_000259\_000 for details).

Product details entry has been extended to include a new button labelled Notes, when pressed product notes can be viewed and updated. It has also been updated to include an indicator ( Notes ) to show when a product has notes.

Product enquiries and the standard product searches have been extended to include a new button labelled Notes, when pressed product notes can be viewed and updated. They have also been updated to include an indicator ( Notes ) to show when a product has notes.

Purchase Order Processing Order Entry parameters have been extended to include a new option labelled Automatically display product notes when products are selected? . When set purchase order entry shows notes for products as they are selected.

Sales Order Processing Order Entry (Options) parameters have been extended to include a new option labelled Automatically display product notes when products are selected? . When set sales order entry and the SOP transaction desktop show notes for products as they are selected.

Please see the accompanying service pack note for further details.

Z060\_000089\_000 Multiple Bin Handling.

Multiple Bin Handling [gx10667]

Please note, the features described in the following text (and accompanying service pack note) are not yet available, they are currently undergoing testing and quality control and will be enabled in a later service pack.

This service pack introduces the ability to operate multiple bins per stock location.

Please note, the following features are only available at sites configured to use the extension database (see service pack ZM60\_000259\_000 for details).

The distribution options within system parameters have been updated to include a new option labelled Multiple Bin Handling . This will provide configuration options for controlling the use of multiple bins throughout the distribution modules.

Stock transactions (issues, receipts, returns, adjustments and transfers) have been updated to take in to account bin numbers for all stocked products (not just those that are batch tracked).

A new button labelled Zones has been added to location maintenance. Zones are used to sub-divide stock locations. For example in to aisles. Stocktakes can be limited to products held within bins situated at specific zones of a stock location.

A new option labelled Bin Maintenance has been added to the system maintenance menu within Stock Control. This allows bins to be created, updated and their contents to be manipulated.

A new option labelled Bin Enquiries has been added to the product enquiry menu. This allows enquiries upon bins, their contents and bin movements.

A new option labelled Bin Reporting has been added to the Reporting menu (within Stock Control). Note, this report is only available in PDF format.

All places within Stock Control, SOP, POP and Manufacturer that issue, receive, adjust or transfer stock have been updated to update quantities recorded within bins where applicable.

Please see the accompanying service pack note for further details.

Please note, printing documents in PDF format requires an up-to-date copy of either PDF\_In-The-Box or All\_In\_The\_Box to be present on each GX client used to perform the document generation.

Please copy ST-Menus from your program unit (\$P) to your data unit (STD) after applying this Service Pack. This step is not required if service pack ZM60\_000080\_000 has been applied and unit 'G3M' has been assigned to your program unit (\$P).

ZO60\_000094\_000 Stock Queue - Various Fixes.

Stock Queue Various Fixes [D18866/D18867/D18868]

---

If an SOP order line has a blank required date then this indicates that the line is required A.S.A.P., for queued products with the allocation method set to Reserve/Allocate/Request this is being ignored and if there are purchase orders available the stock is being reserved even if there is free stock available for allocation.

The stock forecast enquiry has been updated for queued products; it now includes the reserved quantity for purchase orders.

The following places have been updated to include a new button which gives access to the stock forecast enquiry (for the product/location).

SOP manual allocation,  
SOP supply and demand windows,  
SOP stock queue entries window,  
POP order entry (request browse).

ZO60\_000106\_000 Tax Calculation Changes - Discount.

Tax Calculation Prompt Payment (Settlement) Discount [gx19086]

HMRC have stated that from 01/04/2015 (01/05/2014 for supplies of telecommunications and broadcasting services) the calculation of tax when prompt payment (settlement) discount is offered will be changed so that the tax is calculated on the full net amount rather than the

discounted net amount. When payment is made, if the prompt payment (settlement) discount has been taken the tax on the discount amount can be reclaimed (i.e. tax is accounted for on the consideration actually received).

To conform to the new legislation you must (UK based businesses) configure the system (via system parameters, administration, tax codes, tax options) so that tax is NOT calculated net of settlement discount and to (via the discount analysis button) calculate settlement discount on gross invoice values and analyse settlement discount taken to net and tax.

The system must be configured correctly on either 01/04/2015 or 01/05/2014 depending on the nature of your business. After the 01/04/2015 the system will display a warning (within DL and CL) if the system is not configured correctly and the selected company is UK based (i.e. its address country is set to GB ).

Please see the accompanying service pack note for further details.

Z060\_000109\_000 Items Outside the Scope of VAT.

#### Items Outside the Scope of VAT [gx19125]

This service pack updates the system to allow transactions that are outside the scope of VAT to be processed correctly.

In addition it introduces a new format VAT Reconciliation Report which includes an option to export the report to a csv file.

Also the way in which files are exported has changed, instead of prompting for the path and filename prior to exporting the details a number of reports now use the windows save as dialogue.

Please see the note accompanying this service pack for full details.

Z060\_000117\_000 Updates to Link SOP and POP Direct Orders.

SOP/POP Direct Orders [gx19375]

A new system parameter (labelled Generate direct purchase orders for direct sales orders? ) has been added to the SOP Operating Options. When set, purchase orders are automatically created for products when a direct SOP order is entered and cannot be invoiced until the

corresponding purchase order has been fully invoiced.

Please see the accompanying service pack note for further details.

Purchase Order Processing Invoice Input [D19378/79/80/81/86]

---

The trading terms code has been moved to the main invoice details window.

It is no longer possible to analyse purchase invoices to the EC Sales tax code.

When entering tax analysis, the indicator for intra-EC acquisitions has been improved.

The supplier product code and description is now shown when purchase order lines are listed.

It is now possible to part invoice direct orders.

Z060\_000118\_000 Update to Invoice Input.

Invoice Input GL Profit Centre/Account [gx19400]

This service pack introduces a new button (labelled GL Codes ) to the receipt lines windows within the POP invoice input. When the new button is pressed a new window is displayed that shows the current default GL profit centre and account for the invoiced cost of goods value postings (based on the product group and location) and provides the ability to override these for the current receipt line.

Please note these changes do not apply to direct orders, which by

default always post to the direct orders suspense account.

Please see the accompanying service pack note for further details.

ZO60\_000122\_000 Problems in Multiple Bin Handling.

Multiple Bin Handling [D19502/D19503/D19504]

This service pack solves the following problems in systems configured to allow multiple bin handling.

There is no option to add stock to a new bin whilst receiving serialised products.

Stock Transfers do not prompt for a new bin if the product is not held in any bins at the location the stock is being transferred into.

The confirmation window showing the bins in which stock has been placed should not be displayed if the option to automatically receive the stock is chosen and the product is held in a single bin.

If the bin number is manually entered (after clearing the window) in a select window it should automatically be converted to upper case.

This GSP is part of the following Group

Z060_000124_000	Update for Data Protection (GDPR).
-----------------	------------------------------------

Data Protection (GDPR) [gx19515]

---

NOTE: When used as intended these changes provide options that alongside procedures managed outside of Global 3000 allow a business using Global 3000 to comply with the General Data Protection Regulation (GDPR). The existence of these changes do NOT imply that a business using Global 3000 is GDPR compliant.

This service pack introduces new system parameters to enable data protection controls and allow the location of the data retention policy and privacy notice documents to be specified, these can then be viewed whilst creating/amending Customer or Supplier contact details.

A new Data Protection window now appears immediately after a Customer or Supplier contact record is created or updated. This allows users to record and update the privacy and data retention options for the contact.

A new Data Protection Maintenance option has been added to system parameters (within the administration options). This allows users to

manage the data protection preferences for contacts (either individually or in bulk).  
 When data protection controls are initially enabled, the system will prepare the data by assuming that none of the existing contacts have opted in to data retention, receiving marketing material, sharing information with third parties or being aware of the privacy statement. The new Data Protection Maintenance function can then be used to update the contacts in bulk to reflect their correct status.

Note, the new data protection controls require a new phase to be added when a Debtors Ledger or Creditors Ledger period is closed. This will inevitably cause close period to take extra time to complete.

Please see the accompanying note for further details.

Z060\_000138\_000 Updates to Attaching PDF Format Files

Attaching PDF Format Files [D19749]

---

These changes introduce 3 new parameters (labelled Auto attach SOP documents , Auto attach debtors ledger statements and Auto attach POP documents ) in the PDF Format Print Controls window of the Administration Parameters Operating Options. They control if PDF Format documents generated by the system are automatically attached to the relevant transaction/supplier. Previously this was automatic. Each parameter is only available when the appropriate module is configured.

ZO60\_000143\_000 Update to EORI Number Handling.

EORI Numbers [gx19755]

This service pack provides the ability to (optionally) include company  
 and customer/supplier Economic Operators Registration and  
 Identification numbers on SOP Invoices, pro-forma invoices, credit  
 notes and POP Orders.

Note, EORI numbers are only included on documents produced in PDF format.

In addition the size of the EORI number has been increased from 12 to 17 characters.

Please see the note accompanying this service pack for full details.

This GSP has the following Pre-requisites -

ZO 60 147

This GSP is part of the following Group

Z060\_000149\_000 Update to Invoice Input.

Invoice Input [D19776]

This service pack helps to resolve issues of how to process Invoice Input batches, when posting has failed due to an invalid GL profit centre account code combination.

As all P.O.P. processing is complete, the error has to be corrected in Creditors Ledger, from where the batch is also posted. In this situation a new status of \*CL is displayed in P.O.P. invoice input.

Z060\_000151\_000 Update for Multiple Tax Authorities.

#### Tax Authorities [gx19780]

This service pack introduces a new feature within Debtors Ledger. It introduces new settings within System Maintenance and Debtors Ledger which allow sales to be reported to external tax authorities (i.e. reported to a tax authority which is different to the tax authority of the country in which the company resides).

Please see the accompanying service pack note for further details.

ZO60\_000156\_000 Update to Supplier Maintenance - Suspend Suppliers

Suspended Supplier Accounts [gx19809]

This enhancement introduces a new setting of Suspended for the account status, within supplier maintenance.

When a supplier account has its status set to Suspended , no further new invoices, logged invoices, or purchase orders, can be added. Existing transactions can still be paid, however, the supplier is excluded when the automatic selection option is used within auto-payments.

Please see the note accompanying this service pack for further details.
