

Z061\_000001\_000              Multiple Enhancements.

This enhancement pack includes the following updates:

Calendar Maintenance [gx19928]

---

New option of adding a new year within General Ledger whenever a new year is added to the system calendar.  
Please see the note accompanying this service pack for further details.

Delivery Addresses [gx19936]

---

SOP delivery note and POP order prints (PDF format) updated to include the location reference (e.g. What3words) from the delivery address.  
The SOP Transaction Desktop and Purchase Order Entry have been updated to capture this.

Creditors Payment Methods [gx19937]

---

Supplier Maintenance updated to introduce a new payment method of direct debit. Setting the payment method to direct debit is a form of notation and does not in itself trigger the generation of payments.  
The payments for suppliers marked as direct debit payment must be made manually. In some cases entering paid invoices can be a useful alternative to manually entering the payments for suppliers marked payment via direct debit.

Bank Reconciliation [gx19943]

---

Cash Manager Bank Reconciliation updated to include two new buttons in the presented transactions window. The buttons (labelled Transfer In and Transfer Out ) allow a funds transfer to be entered and automatically included in the reconciliation.

Please see the note accompanying this enhancement pack for further details of all the above updates.

Z061\_000002\_000 Enhancement - Intelligent Ordering.

POP Intelligent Ordering [gx19929]

This enhancement pack introduces a new feature named Intelligent Ordering, it is intended to be used in place of Order Entry for generating simpler orders. It allows selection of a product and quantity after which the system suggests a number of potential suppliers for the order, these can then be selected based on price, arrival time etc. Once the selections have been completed purchase orders are generated.

Please see the note accompanying this service pack for further details.

Please note, the menu file has been updated to add a new option to the Order Processing Menu (Intelligent Ordering). Please copy P0-Menus from your program unit (\$P) to your data unit (STD) after applying this Service Pack. This step is not required for systems with unit 'G3M' assigned to the program unit (\$P).

Z061\_000003\_000            Enhancement - Purchase Order Entry.

Purchase Order Entry [gx19953]

This enhancement pack updates order entry to provide a new option that allows a new order to be created by copying an existing one.

Please see the note accompanying this service pack for further details.

Z061\_000004\_000 Enhancement to Stock/Distribution Cost Postings.

Stock Control and Distribution Cost Postings [gx19932]

The changes affect Stock Control, Sales Order Processing, Purchase Order Processing, Landed Costs and Manufacturer. They update the way that cost postings are processed so that they are posted directly into the General Ledger rather than via an interface file produced by the Process Costs function.

Note, the process costs function remains active and, on the menu, to handle the posting of existing files and for legacy recovery handling.

Post Application Text

After application of this enhancement pack 'Process Costs' and General Ledger 'Auto-Transfer' should be used to fully process any remaining sales and operating costs.
